this book provides an overview of the research work on data privacy and privacy enhancing technologies carried by the

participants of the ares project are advanced research in privacy and security. csd2007 00004 has been one of the most important research projects funded by the Spanish government in the fields of computer security and privacy. It is part of the now extinct *consolider ingenio 2010* program, a highly competitive program which aimed to advance knowledge and open new research lines among top Spanish research groups. The project started in 2007 and will finish in 2014, composed by 6 research groups from 6 different institutions. It has gathered an important number of researchers during its lifetime. Among the work produced by the ares project, one specific work package has been related to privacy. This book gathers works produced by members of the project related to data privacy and privacy enhancing technologies. The presented works not only summarize important research carried in the project but also serve as an overview of the state of the art in current research on data privacy and privacy enhancing technologies.

This book constitutes the refereed proceedings of the 10th international conference on trust and privacy in digital business, *trustbus 2013*, held in Prague, Czech Republic, in August 2013, in conjunction with *dexa 2013*. The 16 revised full papers presented were carefully reviewed and selected from numerous submissions. The papers are organized in the following topical sections: access control and authentication; identity and trust management; privacy and confidentiality management; information systems security; security policies; legal issues; and trust and privacy in mobile and pervasive environments.

Identity crime, which encompasses both identity theft and identity fraud, is one of the fastest growing crimes around the world. Yet it lacks its own identity: there is no universally accepted definition, little understanding of what the crime is or should be, and no legal framework placing the crime into a coherent and effective grouping of criminal sanctions. In this book, Dr. Syed Ahmed addresses and proposes solutions for resolving these issues and tackles head-on the various facets of what is needed to deal with identity crime. A comprehensive and an exhaustive study of different types of identity crime is conducted, and practical recommendations for preventing and minimizing the impact of identity crime are presented for all to consider.

This book constitutes the refereed post-proceedings of two workshops held at the 5th international conference on social informatics, *socinfo 2013*, in Kyoto, Japan, in November 2013. The first workshop on quality, motivation, and coordination of open collaboration, *qmc 2013*, and the first international workshop on histoinformatics, *histoinformatics 2013*. The 11 revised papers presented at the workshops were carefully reviewed and selected from numerous submissions. They cover specific areas of social informatics. The *qmc 2013* workshop attracted papers on new algorithms and methods to improve the quality or to increase the motivation of open collaboration to reduce the cost of financial motivation or to decrease the time needed to finish collaborative tasks. The papers presented at *histoinformatics 2013* aim at improving the interaction between computer science and historical

science towards fostering a new research direction of computational history
