this paper i provides evidence on the procyclical investment behavior of major institutional investors during the global financial crisis ii identifies the main factors that could account for such behavior iii discusses the implications of procyclical behavior and iv proposes a framework for sound investment practices for long term investors such procyclical investment behavior is understandable and may be considered rational from an individual institution s perspective however our main conclusion is that behaving in a manner consistent with longterm investing would lead to better long term risk adjusted returns and importantly could lessen the potential adverse effects of the procyclical investment behavior of institutional

investors on global financial stability

this is the only textbook that describes 1 how investors actually behave 2 the reasons and causes of that behavior 3 why the behavior hurts their wealth and 4 what they can do about it jacket
