manufacturing processes is meant for the students of b tech in all branches of engineering namely mechanical electronics computer information technology electrical and civil this book aims to fulfill specific need effective from 2008 09 sessions

mathematics and technology education shape students futures while traditional teaching methods overlook the cultural backgrounds and experiences of diverse learners culturally sustaining pedagogies csp help reimagine math and technology classrooms so students feel valued and included this approach encourages educators to connect lessons to students communities languages and thought patterns while challenging systems that have historically excluded or marginalized certain groups further research into culturally sustaining pedagogies can make mathematics and technology education more relevant

equitable and empowering culturally sustaining pedagogies in mathematics and technology education research practices and critical reflections explores how culturally sustaining pedagogies transform mathematics and technology education by valuing students cultural identities and experiences it examines teaching practices curriculum design and leadership experiences that make learning more inclusive and equitable this book covers topics such as pre service teaching stem education and artificial intelligence and is a useful resource for educators sociologists academicians researchers and scientists

with special reference to india

this book includes selected papers from the international conference on green technology for smart city and society gtscs 2020 organized by the institute of technical education and research siksha o anusandhan university bhubaneswar india during 13 14 august 2020 the book covers topics such as machine learning artificial intelligence deep learning optimization algorithm iot signal processing etc the book is helpful for researchers working in the discipline of electrical electronics and computer science the researchers working in the allied domain of communication and control will also find the book useful as it deals with the latest methodologies and applications

production technology is intended for the students of b tech in mechanical production and manufacturing engineering it deals with fundamental concepts of foundry forming welding technologies and foundry mechanization additionally material regarding furnaces solidification of castings casting defects metals and alloys and plastics has been provided the book covers both theoretical and analytical concepts the analytical concepts are introduced starting from fundamentals for easy comprehension several worked examples review and objective type questions are provided at the end of each chapter more than 150 line sketches are included which are self explanatory and easy to reproduce in the examination

the book covers cutting edge and advanced research in modelling and graphics gathering high quality papers presented at the first international conference on emerging technology in modelling and graphics held from 6 to 8 september 2018 in kolkata india it addresses topics including image processing and analysis image segmentation digital geometry for computer imaging image and security biometrics video processing medical imaging and virtual and augmented reality

selected peer reviewed papers from the international conference on recent advances in mechanical engineering and interdisciplinary developments icramid 2014 march 7 8 2014 tamis nadu india

publisher s note products purchased from third party sellers are not guaranteed by the publisher for quality authenticity or access to any online entitlements included with the product explore the latest processes techniques and technologies to economically refine and produce biofuels featuring contributions from a wide range of experts in the field this comprehensive guide explores biofuel chemistry refining processes and performance characteristics unlike most biofuel resources that broadly cover non conventional energy

sources the book goes into specifics about engine performance making it a highly valuable resource for students researchers and practitioners grounded in professional relevance and expertise principles of biofuels and hydrogen gas production and engine performance discusses the theories and experimental procedures required to economically prepare biofuels you will get full coverage of extraction hydrogen gas from biomass and water media as well as refining biofuels from algae and biomass end of chapter questions throughout reinforce comprehension provides information on biofuels that will benefit human health and the environment covers biofuel properties impacts and economic factors written by team of international experts led by a seasoned biofuels educator
