introspection of classes methods and fields c To create and instantiate objects without knowing their class type at compile time d All of the above Answer d All of the above Explanation Reflection in Java provides a powerful mechanism for Dynamic access Accessing and modifying class information such as methods and fields at runtime Introspection Examining the structure and behavior of classes and objects at runtime Dynamic object creation Creating new instances of objects without knowing their class type at compile time 6 Which of the following is NOT a core principle of SOLID design a Single Responsibility Principle b OpenClosed Principle c Liskov Substitution Principle d Abstraction Principle Answer d Abstraction Principle Explanation SOLID stands for Single Responsibility Principle SRP Each class or module should have a single welldefined responsibility OpenClosed Principle OCP Software entities classes modules should be open for extension but closed for modification Liskov Substitution Principle LSP Subtypes should be substitutable for their base types without altering the correctness of the program 5 Interface Segregation Principle ISP Clients should not be forced to depend on interfaces they dont use Dependency Inversion Principle DIP Highlevel modules should not depend on lowlevel modules Both should depend on abstractions 7 What is the difference between a synchronised block and a synchronised method in Java a A synchronized block locks a specific object while a synchronized method locks the entire object b A synchronized method locks a specific object while a synchronized block locks the entire object c A synchronized block locks a specific object while a synchronized method locks the entire class d There is no difference between the two Answer a A synchronized block locks a specific object while a synchronized method locks the entire object Explanation Synchronized block Locks a specific object Only one thread can execute the code within the block at a time holding the lock on the specified object Synchronized method Locks the entire object on which the method is called Only one thread can execute the synchronized method at a time holding the lock on the object 8 Which of the following statements is true regarding the final keyword in Java a It prevents a variable from being reassigned b It prevents a method from being overridden c It prevents a class from being inherited d All of the above Answer d All of the above Explanation The final keyword in Java serves multiple purposes related to immutability and inheritance Variable Prevents reassignment Once a final variable is assigned its value cannot be changed Method Prevents overriding Final methods cannot be overridden by subclasses Class Prevents inheritance Final classes cannot be extended by other classes 6 9 What is the purpose of the transient keyword in Java a To make a variable inaccessible from other classes b To prevent a variable from being serialized c To make a variable threadsafe d None of the above Answer b To prevent a variable from being serialized Explanation The transient keyword in Java marks a variable as not eligible for serialization When an object is

serialized converted to a byte stream for storage or transmission transient variables are excluded from the process 10 What is the difference between a checked exception and an unchecked exception in Java a Checked exceptions must be explicitly handled while unchecked exceptions dont require handling b Unchecked exceptions must be explicitly handled while checked exceptions dont require handling c Checked exceptions are runtime exceptions while unchecked exceptions are compiletime exceptions d Unchecked exceptions are runtime exceptions while checked exceptions are compiletime exceptions Answer a Checked exceptions must be explicitly handled while unchecked exceptions dont require handling Explanation Checked exceptions These are exceptions that the compiler expects the programmer to handle Examples include IOException SQLException and ClassNotFoundException The compiler forces you to handle these exceptions with trycatch blocks or declare them in the method signature using the throws keyword Unchecked exceptions These are exceptions that are not checked at compile time Examples include NullPointerException ArithmeticException and ArrayIndexOutOfBoundsException While you can handle them the compiler doesnt force you to do so They are typically caused by programming errors or unexpected conditions Conclusion 7 By tackling these advanced Java multiplechoice questions and analyzing their detailed explanations you can solidify your understanding of key concepts and enhance your skills in Java programming This blog post serves as a valuable resource for developers seeking to deepen their Java knowledge and excel in their programming journey Remember to apply these concepts and best practices to build robust reliable and ethical software applications
