mexico is more than a country it is a concept that is the product of a complex network of discourses as disparate as the rhetoric of chicano nationalism english language literature about mexico and mexican tourist propaganda the idea of mexicanness says daniel cooper alarc n has arisen through a process of erasure and superimposition as these discourses have produced contentious and sometimes contradictory descriptions of their subject by considering mexicanness as a palimpsest of these competing yet interwoven narratives cooper offers a paradigm through which the construction and representation of cultural identity can be studied he shows how the chicano myth of aztlan was constructed upon earlier mesoamerican myths discusses representations of mexico in texts by nineteenth and twentieth century writers and analyzes the content of tourist literature thereby revealing the economic social and political interests that drive the production of mexicanness today this original linking of seemingly incongruous discourses corrects the misconception that mexicanness is produced only by hegemonic groups cooper shows how mexico has been defined and represented by both mexicans and non mexicans as more than a political or geographic entity and he particularly reveals how mexicanness has

been exploited by mexicans themselves through the promotion of tourism as a form of neocolonialism cooper s work is valuable both for identifying attempts to revise and control mexican myth history and culture and for defining the intricate relationship between history historiography and cultural nationalism the aztec palimpsest extends existing analyses of mexicanness into new theoretical realms and provides a fresh perspective on the relationship between the united states and mexico at a time when these two nations are becoming more intimately linked
