this book contains peer reviewed papers that were presented at the international conference on intelligent computing systems and applications icicsa 2022 it explores the latest advancements in fields such as artificial intelligence machine learning data science natural language processing computer vision image processing embedded systems robotics the internet of things iot computer networking and communications optimization as well as security and cryptography additionally the book delves into various application areas and modeling methodologies across multiple disciplines it serves as a valuable resource for researchers and academics working in these relevant fields

an inquiry made to obtain any information is known as an interrogation while asking the person tries to get an answer that allows him to satisfy his doubts the interviewers often ask simple questions in a very twisted fashion to confuse the candidates difficult questions answers reflect the knowledge of the giver as well as his overall personality for example which is heavier a kilogram of feathers or 1000 grams of lead solution both the weights are equal and what happened in kolkata yesterday from 8 to 9 o clock solution an hour had passed these questions have a trick because they are framed in such a way that the answers seem simple but in reality they are not it can be said that the questioners confuse the candidates as they hide their answers using rhetorical resources and various devices in some cases the answer is found in the question itself but in secret tricky questions are also used for fun or as a mental activity of logical practice like a truck driver passing down a street in the wrong direction some policemen saw him but they didn't say anything to him why solution because the truck driver was on foot he shaves all day but still has a beard who is he solution barber some months have thirty days and others thirty one but how many months have twenty eight solution every month has at least twenty eight days which object becomes wet when it dries solution towel how do you draw a square with three lines solution draw the square first and

then draw three lines inside the square thus an answer to a tricky question can lead to confusion due to the confusion generated question these types of questions are very specific to the areas in which people s knowledge or behavior is evaluated generally such difficult questions can be perceived as misleading or incorrect because something is being implied that is not in reality however they can also be seen as methods whose precise purpose is to test the candidate and determine whether he or she is fully capable of answering the question that he or she is saying i know in this way about five thousand questions and answers have been given in the present book which is equally useful for all competitive examinations

today the internet has become a prime venue for social interaction through online services where people share aspects of their daily lives talk about their interests with other like minded people and express their opinions without formality or constraint against this background this book investigates the aesthetics of informal text based computer mediated communication cmc such as question and answer websites conceived of as a distinctive medium of communication based on cosmopolitan brand communities that share the same field of expertise and a common interest in a particular topic by adopting sentiment analysis in order to recognize the positive or negative semantic orientation of texts and their emotional style the book demonstrates that the aesthetics of such informal texts written using digital english as a lingua franca delf is influenced by how we associate emotions and opinions with certain linguistic aspects such as specific words or syntactic patterns and how we can classify linguistic expressions according to the type of opinion that they convey
