as we enter into the 21 century the presence of technology particularly techno science in everyday life is overwhelming institutions in the modern world are affected  
 by this presence like janus the ancient roman god whose double faced head signified his knowledge of the present and the future education has always been a two  
 faced enterprise the past establishes goals and methods of education and the other face tries to capture the future and suggests and proposes new directions of  
 thought and new styles of behavior for the generation which in a few years will take over both routines and societal innovation history tells us that this face of  
 education has always been sensitive to emerging technologies technologies of communication and information have been particularly influential in new directions of  
 society in particular of education the transition from orality to writing marked a new role for the teacher from the sole repository of accumulated knowledge the  
 teacher became a guide and interpreter of registered knowledge the emergence of hardware in the form of documents and books initiated a companionship between  
 teacher and hardware it is also remarkable how the emergence of writing strengthened individual memory contrary to the concerns of thamus when theuth explained  
 to him the discovery of writing the conservative king was afraid that the new invention would implant forgetfulness in the souls of men
