the new science of morality that will change how we see each other how we build our communities and how we live our lives in changing how we choose david redish makes a bold claim science has cracked the problem of morality redish argues that moral questions have a scientific basis and that morality is best viewed as a technology a set of social and institutional forces that create communities and drive cooperation this means that some moral structures really are better than others and that the moral technologies we use have real consequences on whether we make our societies better or worse places for the people living within them drawing on this new scientific definition of morality and real

world applications changing how we choose is an engaging read with major implications for how we see each other how we build our communities and how we live our lives many people think of human interactions in terms of conflicts between individual freedom and group cooperation where it is better for the group if everyone cooperates but better for the individual to cheat redish shows that moral codes are technologies that change the game so that cooperating is good for the community and for the individual redish an authority on neuroeconomics and decision making points out that the key to moral codes is how they interact with the human decision making process drawing on new insights from behavioral economics sociology and neuroscience he shows that there really is a new science of morality and that this new science has implications not only for how we understand ourselves but also for how we should construct those new moral technologies

to cope with the chaotic new business environment organizations must find ways to manage the problems of change but also the process of change itself yesterday s solutions are obsolete innovative solutions are rare yet even the best require not only the efforts of individuals but other agents as well sims sees change agents throughout any organization and at all levels line and staff people human resource specialists and those who have hitherto had little reason to tackle such tasks and have not been accountable for their outcomes unique models are presented for change interventions along with techniques and tools that executives need to accomplish them the result is a book that experienced executives will understand and utilize but also one that will bring novices up to speed providing new ways to use their own instincts and capabilities for innovation sims and his contributors challenge the traditional prescription for creating change providing a compelling critique of accepted approaches to change management highlighting the strengths of these approaches and emphasizing what can be extracted to foster change each author provides insights into the competencies skills and values required for the rapid and successful creation of lasting change in doing so they also reemphasize that there is no universal approach to change management and that the need for innovation flexibility and adaptability remains dominant

crystal clear examples that are rich in content and aligned to standards from a leading expert in the field alan novemberauthor and consultant create a dynamic interactive environment that extends beyond the classroom in this digital era how can educators seamlessly incorporate technology into everyday classroom use what tools will empower students promote digital equity and extend thoughtful learning the economical solution is handheld and other portable technologies in this resource educators learn how to build learning experiences that use technology to support thinking data analysis and information retrieval and sharing for standards linked learning both in and beyond the classroom

changing how we teach and learn with handheld computers shows how handheld computing can broaden the locales and communities in which students can grow in academic understanding these tools enable students to collaborate and network while promoting the extension of learning beyond the time and space of a classroom carolyn staudt a leading expert in technology integration gives educators practical applications through surefire learning activities in all content areas resources for downloading student friendly software beaming and data sharing tips step by step processes for manipulating and displaying data field knowledge from classrooms already employing handhelds handheld devices are already a part of the students world now educators can embrace this technology and create a powerful learning environment that leaves no student behind

this book constitutes the proceedings of the 13th international conference spatial cognition 2024 held in dublin ireland during june 25 29 2024 the 9 full papers were carefully reviewed and selected from 12 submissions the papers are organized in topical sections as follows mathematics gender differences steam science technology engineering art and mathematics and early childhood
