ernest r may s strange victory presents a dramatic narrative and reinterpretation of germany s
six week campaign that swept the wehrmacht to paris in spring 1940 before the nazis killed
him for his work in the french resistance the great historian marc bloch wrote a famous short
book strange defeat about the treatment of his nation at the hands of an enemy the french
had believed they could easily dispose of in strange victory the distinguished american
historian ernest r may asks the opposite question how was it that hitler and his generals
managed this swift conquest considering that france and its allies were superior in every
measurable dimension and considering the germans own skepticism about their chances
strange victory is a riveting narrative of those six crucial weeks in the spring of 1940 weaving
together the decisions made by the high commands with the welter of confused responses
from exhausted and ill informed or ill advised officers in the field why did hitler want to turn
against france at just this moment and why were his poor judgment and inadequate
intelligence about the allies nonetheless correct why didn t france take the offensive when it

might have led to victory what explains france's failure to detect and respond to germany's attack plan it is may's contention that in the future nations might suffer strange defeats of their own if they do not learn from their predecessors' mistakes in judgment

nuclear magnetic resonance (nmr) spectroscopy is the most powerful technique for characterisation of biomolecular structures at atomic resolution in the solution state this timely book entitled biomolecular nmr spectroscopy focuses on the latest state of the art nmr techniques for characterisation of biological macromolecules in the solid and solution state the editors dr andrew dingley university of auckland new zealand and dr steven pascal massey university new zealand have organised the book into four sections covering the following topics i sample preparation ii structure and dynamics of proteins iii structure and dynamics of nucleic acids and protein nucleic acid complexes and iv rapid and hybrid techniques including the latest advances in nmr data acquisition and structural analysis and approaches that combine nmr data with data from complementary physical techniques the book will be a valuable resource for experienced scientists in academia government and public services and in industry it will also be suitable for newcomers and graduate students entering the field of biomolecular nmr spectroscopy

little attention has been paid to the murky ultra business of gathering intelligence among and forming estimates about friendly powers and friendly or allied military forces how rarely have scholars troubled to discover when states entered into coalitions or alliances mainly and explicitly because their intelligence evaluation of the potential partner concluded that making the alliance was from the originator's national security interest the best game in town the twentieth century has been chosen to enhance the coherence of and connections between the subject matter of this under explored part of intelligence studies
