this book summarizes the state of the art research presented at the fourth international conference on frontiers of polymers and advanced materials held in Cairo, Egypt, in January 4-9, 1997. This conference follows the successful conferences held in Kuala Lumpur, Malaysia, in 1995; in Jakarta, Indonesia, in 1993; and in New Delhi, India, in 1991. These conferences focussed on the most recent and important advances in a wide range of carefully chosen subject areas dealing with advanced materials, their science and technology, and new business opportunities resulting from recent technological advances. As its predecessors, the conference held in Cairo was truly international with strong participation of 488 delegates representing 37 countries from the USA and Egypt as well as Europe, South East Asia, Japan, South Africa, and the Middle East. The conference was organized by the Egyptian Academy of Scientific Research and Technology, the Arab Society of Materials Science, and the State University of New York at Buffalo. The stated goals of the conference were to highlight advances and new findings in the general area of polymers and advanced materials, to foster global collaboration between the USA, Egypt, and other nations in the general field of polymers and advanced materials, to promote the development of scientific infrastructure in this field among the different participating countries, especially in the Middle East, to create a basis for future long-term scientific exchanges between the USA and Egypt and/or other countries.
