the design and functioning of an information system improve to the extent that the system can

handle the questions people ask surprisingly however researchers in the cognitive computer and information sciences have not thoroughly examined the multitude of relationships between information systems and questions both question asking and answering the purpose of this book is to explicitly examine these relationships chapter contributors believe that questions play a central role in the analysis design and use of different kinds of natural or artificial information systems such as human cognition social interaction communication networks and intelligent tutoring systems their efforts show that data structures and representations need to be organized around the questioning mechanisms in order to achieve a quick retrieval of relevant useful information

this book provides you with a wide range of general knowledge questions and answers in this book you will not only learn questions but also get answers to them

this collection includes over 180 commonly asked questions each question is arranged in a particular section under headings such as food nature far away places earth and sky long ago how things work and ourselves
