recoge 1 the context 2 the assessment 3 pressures 4 human activities 5 problems 6 conclusions

three years ago the faculty of law and administration of the university of silesia and the faculty of law of the university of leicester embarked on a joint research and academic co operation programme with the support of the british council in warsaw the programme resulted in the organisation of two academic conferences one in leicester and one in katowice this book is the tangible result of these conferences the

content of the book reflects the wide ranging nature of the collaboration between the two faculties environmental law public international law intellectual and cultural property law are the main areas that are covered but certain issues of constitutional law european law social law company law and legal education are also addressed the main strength of this book is found in its breadth of coverage and the detailed examination of key issues such as the rights of minorities the transboundary movement of waste in europe and the environmental problems which it creates the theft and illegal exportation of cultural property and the convergence of the droit d auteur and copyright traditions

in this follow up to the highly successful ethnography unbound michael burawoy and nine colleagues break the bounds of conventional sociology to explore the mutual shaping of local struggles and global forces in contrast to the lofty debates between radical theorists these nine studies excavate the dynamics and histories of globalization by extending out from the concrete everyday world the authors were participant observers in diverse struggles over extending citizenship medicalizing breast cancer dumping toxic waste privatizing nursing homes the degradation of work the withdrawal of welfare rights and the elaboration of body politics from their insider vantage points they show how groups negotiate circumvent challenge and even re create the complex global web that entangles them traversing continents and extending over three years this collaborative research developed its own distinctive method of grounded globalization to grasp the evaporation of traditional workplaces the dissolution of enclaved communities and the fluidity of identities forged between the local and global these compelling essays make a powerful case for ethnography's insight into global dynamics

this book evaluates current technology and policy practices in the united states and western europe in the areas of environmental risk assessment risk prioritization and risk management and recommends strategies for successful risk management regarding cleanups in central and eastern europe cee the primary focus is on the evaluation of proven risk management strategies which can gain public and regulatory acceptance and thereby accelerate the demonstration and use of innovative us and host country environmental technologies in cee this will in turn help to accelerate the use of innovative cost effective cleanup systems at us doe sites and the use of us environmental technologies in foreign markets the book emphasizes using risk management strategies as key components of integrated life cycle systems designed to treat hazardous radioactive waste and to remediate soil groundwater plumes other topics of discussion include partnerships with international companies for commercial applications acceptance by cee governments and relationships to other us government initiatives
