master s thesis from the year 2021 in the subject business economics market research grade 1 0 accadis hochschule bad homburg language english abstract mobile payment systems are an innovation that allows people to make contactless payments with a mobile device such as a smartphone at the cash register in brick and mortar retail outlets without carrying a wallet with credit and debit cards while other countries have almost entirely adopted and integrated this innovation into their daily lives adoption rates in germany remain significantly low hence the objective of this work is to analyze the future of mobile payment systems in germany with respect to the reasons for adoption or refusal in particular the following research question was addressed will mobile payment methods replace physical cards in germany or will certain factors prevent full adoption

as we enter a new millennium it is clear that we are in the midst of one of the most dramatic technological revolutions in history that is changing everything from the ways that we work communicate participate in politics and spend our leisure time the technological revolution centers on computer information communication and multimedia technologies is often interpreted as the beginnings of a knowledge or information society and therefore ascribes technologies a central role in every aspect of life this great transformation poses tremendous challenges to critical social theorists citizens and educators to rethink their basic tenets to deploy the media in creative and productive ways and to restructure the workplace social institutions and schooling to respond constructively and progressively to the technological and social changes that we are now experiencing

we are defined by the tools and technologies we use they shape our identity they feed and shelter us but they also threaten our very existence what separates us from all other animals is primarily the plethora of tools and technologies we created for our well being and for our very survival they are the source of our admirable success as a species and they are the source of our most terrifying problems sometimes they are the only solution to the very problems they created that puts us in a race against ourselves a race among technologies a race between the good they do and the misery they cause often the same technology doing both at different times and under different conditions this has been the human condition from the beginning of our species and it will likely be the human condition at the end although we appear helpless being dragged along a road carved by our own creations there are some things we can do to minimize the risk to ourselves without giving up all the advantages of a myriad of technologies we created we may not be able to eliminate the basic paradox of human existence but we may somewhat reduce the suffering this book is about the beauty and the misery of our technological human society offering some modest remedies for the misery while praising the beauty

a much needed sobering look at the seductive promises of new technologies you couldn't ask for a better guide than jack stilgoe his book is measured fair and incisive hannah fry university college london uk and author of hello world how to be human in the age of the machine a cracking and insightful little book that thoughtfully examines the most important political and social question we face how to define and meaningfully control the technologies that are starting to run our lives jamie bartlett author of the people vs tech how the internet is killing democracy and how we save it innovation has not only a rate but also a direction stilgoe's excellent new book tackles the directionality of ai with a strong call to action the book critiques the idea that technology is a pre-determined force and puts forward a concrete proposal on how to make sure we are making decisions along the way that ask who is benefitting and how can we open the possibilities of innovation while steering them to deliver social benefit mariana mazzucato university college london uk and author of the value of everything making and taking in the global economy looking closely at the prospects and

problems for autonomous vehicles jack stilgoe uncovers layer after layer of an even more fascinating story the bizarre disconnect between technological means and basic human ends in our time a tour de force of history and theory the book is rich in substance unsettling in its questions and great fun to read langdon winner rensselaer polytechnic institute usa too often we understand the effects of technological change only in hindsight when technologies are new it is not clear where they are taking us or who's driving innovators tend to accentuate the benefits rather than risks or other injustices technologies like self driving cars are not as inevitable as the hype would suggest if we want to realise the opportunities spread the benefits to people who normally lose out and manage the risks silicon valley's disruptive innovation is a bad model steering innovation in the public interest means finding new ways for public and private sector organisations to collaborate
