describing the technologies to combine language resources flexibly as web services this book provides valuable case studies for those who work in services computing language resources human computer interaction hci computer supported cooperative work cscw and service science the authors have been operating the language grid which wraps existing language resources as atomic language services and enables users to compose new services by combining them from architecture level to service composition level the book explains how to resolve infrastructural and operational difficulties in sharing and combining language resources including interoperability of language service infrastructures various types of language service policies human services and service failures the research based on the authors operating experiences of handling complicated issues such as intellectual property and interoperability of language resources contributes to exploitation of language resources as a service on the other hand both the analysis based on using services and the design of new services can bring significant results a new style of multilingual communication supported by language services is worthy of analysis in hci cscw and the design process of language services is the focus of valuable case studies in service science by using language resources in different ways based on the language grid many activities are highly regarded by diverse communities this book consists of four parts 1 two types of language service platforms to interconnect language services across service grids 2 various language service composition technologies that improve the reusability efficiency and accuracy of composite services 3 research work and activities in creating language resources and services and 4 various applications and tools for understanding and designing language services that well support intercultural collaboration

the book introduces the concept of cloud manufacturing and describes the cloud service technology system behind it the authors discuss key technologies of manufacturing cloud

service management including service construction evaluation and composition and scheduling with abundant case studies the book is an essential reference for researchers and engineers in manufacturing and information management

this volume constitutes the refereed proceedings of the confederated international conferences cooperative information systems coopis 2013 distributed objects and applications doa trusted cloud 2013 and ontologies data bases and applications of semantics odbase 2013 held as part of otm 2013 in september 2013 in graz austria the 47 revised full papers presented together with 6 short papers and 5 keynotes were carefully reviewed and selected from a total of 137 submissions the papers are organized in topical sections on business process management process modelling service management social networking models and schemas technical advances in cloud computing towards trusted cloud computing privacy for the cloud querying and mining semantic information semantic matching and mapping semantic information management semantics in use

formal methods for open object based distributed systems v brings together research in three important and related fields formal methods distributed systems object based technology such a convergence is representative of recent advances in the field of distributed systems and provides links between several scientific and technological communities the wide scope of topics covered in this volume range in subject from uml to object based languages and calculi and security and in approach from specification to case studies and verification this volume comprises the proceedings of the fifth international conference on formal methods for open object based distributed systems fmoods 2002 which was sponsored by the international federation for information processing ifip and held in enschede the netherlands in march 2002

this book constitutes the proceedings of the 4th kes international symposium on agent and multi agent systems kes amsta 2010 held in june 2010 in gdynia poland the discussed field is concerned with the development and analysis of ai based problem solving and control architectures for both single agent and multiple agent systems only 83 papers were selected for publication in both volumes which focus on topics such as multi agent systems design and implementation negotiations and social issues services and semantic cooperation coordination and teamwork agent based modeling simulation and decision making multi agent applications management and e business mobile agents and robots and machine learning

cloud computing theory and practice third edition provides students and it professionals with an in depth analysis of the cloud from the ground up after an introduction to network centric computing and network centric content the book reviews basic concepts of concurrency and parallel and distributed systems presents critical components of the cloud ecosystem as cloud service providers cloud access cloud data storage and cloud hardware and software covers cloud applications and cloud security and presents research topics in cloud computing specific topics covered include resource virtualization resource management and scheduling and advanced topics like the impact of scale on efficiency cloud scheduling subject to deadlines alternative cloud architectures and vehicular clouds an included glossary covers terms grouped in several categories from general to services virtualization desirable attributes and security presents updated content throughout chapters on concurrency cloud hardware and software challenges posed by big data mobile applications and advanced topics includes an expanded appendix that presents several cloud computing projects provides more than 400 references in the text including recent research results in several areas related to cloud computing

computational collective intelligence cci is most often understood as a subfield of artificial intelligence ai dealing with soft computing methods that enable group decisions to be made or knowledge to be processed among autonomous units acting in distributed environments the needs for cci techniques and tools have grown significantly recently as many information systems work in distributed environments and use distributed resources based systems social networks and multi agent systems very often need these tools for working out consistent knowledge states resolving conflicts and making decisions therefore cci is of great importance

for today s and future distributed systems methodological theoretical and practical aspects of computational collective intelligence such as group decision making collective action coordination and knowledge integration are considered as the form of intelligence that emerges from the collaboration and competition of many individuals artificial and or natural the application of multiple computational intelligence technologies such as fuzzy systems evolutionary computation neural systems consensus theory etc can support human and other collective intelligence and create new forms of cci in natural and or artificial systems
