this book highlights the diverse methods needed to study a complex media environment and the nuance and richness of the

understanding gained by doing so by offering examples of political communication research considering multiple platforms simultaneously political communication research that considers multiple media platforms is difficult and expensive to perform and therefore relatively rare yet studying media platforms in isolation ignores the realities of the varied and complicated contemporary media experience where most individuals consume information from multiple media outlets media platforms from traditional outlets such as newspapers and television to newer online platforms such as social media have proliferated in recent years this makes the media environment itself more complex as classic understandings of how the media function give way to a growing recognition of the hybrid media system where divisions between content and producers are opaque and where information is gleaned from increasingly diverse and numerous sources studying political communication across platforms allows better understanding of which types of experiences and effects are universal and which are specific to particular platforms this book was originally published as a special issue of political communication

business processes and information systems evolve constantly and affect each other in non trivial ways aligning security requirements between both is a challenging task this work presents an automated approach to extract access control requirements from business processes with the purpose of transforming them into a access permissions for role based access control and b architectural data flow constraints to identify violations of access control in enterprise application architectures

this collection argues that being aware of and reflecting on language form and language use is a powerful tool not only in language learning but also in wider society it adopts an interdisciplinary stance one chapter argues the need for language awareness in business contexts while another examines the role of critical cultural awareness and language awareness in education as bildung others report on research studies in language classrooms and in teacher education language awareness is interrogated from a range of perspectives such as peer interaction teaching young learners learner strategies and strategies for writing online reading and oral fluency training the scope is global including contributions from canada germany iran japan spain and the uk and covers bilingual as well as multilingual contexts the book will be of interest to language teachers language teacher educators other language professionals and generally to the language aware this book was originally published as a special issue of language awareness

nursing knowledge and practice is a comprehensive textbook which forms an ideal basis for foundation nursing students the core emphasis in the organisation and presentation of knowledge in this third edition remains focused on the in depth knowledge

required by nurses to deliver care in the practice setting the chapter contents encompass knowledge that applies to all branches of nursing e.g. communication, confusion, aggression and rehabilitation, safety and risk, infection control, medicines etc. The structure of all chapters is unique in integrating knowledge from subject areas often taught separately in the nursing curriculum. This enables the foundation student to integrate this range of knowledge in making decisions about the delivery of nursing care to patients/clients in all fields of nursing. Exercises are included to encourage reflection on practice and develop critical thinking skills. It also promotes the expansion of professional knowledge through the development of portfolio evidence building on the outstanding success of previous editions. The authors have drawn extensively on current best evidence including research, policy and substantial internet-based resources reflecting UK and international perspectives. Each chapter begins with an overview of the content and concludes with a summary to help evaluate learning. Case studies reflect the diverse range of client needs and care settings of the four nursing branches and help relate theory to practice. Reflective exercises and suggestions for portfolio evidence along with decision-making activities promote reflection on personal experience and links to nursing practice using a problem-based approach. Current research is highlighted throughout demonstrating the evidence base for practice decisions. Key web sites are annotated for further reading and references encourage readers to pursue contemporary evidence that underpins competency-based practice. Full colour throughout. Content fully updated in line with developments in clinical practice, teaching requirements and the evidence base. Free electronic ancillaries on Evolve enhance the knowledge provided in each chapter with additional information, exercises and resources. An introductory chapter on nursing knowledge and practice explores the role and context of nursing nationally and internationally, providing foundation information on core knowledge areas common to all nursing curricula.

This book gathers papers presented at the international conference on advanced intelligent systems for sustainable development (AIS2SD 2018) which was held in Tangiers, Morocco on 12-14 July 2018, highlighting the latest research and advances in the field of healthcare. It shares essential insights into the health sector and is intended to stimulate further discussion and promote closer interdisciplinary collaboration among researchers and health professionals.
