it all started with von neumann and morgenstern half a century ago their theory of games and economic behavior gave birth to a whole new area of mathematics concerned with the formal problems of rational decision as experienced by multiple agents now game theory is all around us making its way even into regular conversations in the present book mehlmann presents mathematical foundations and concepts illustrated via social quandaries mock political battles evolutionary confrontations economic struggles and literary conflict most of the standard models the prisoners dilemma the arms race evolution duels the game of chicken etc are here many non standard examples are also here the legend of faust shootouts in the movies the madness of odysseus to name a few the author uses familiar formulas fables and paradoxes to guide readers through what he calls the hall of mirrors of strategic decision making his light hearted excursion into the world of strategic calculation shows that even deep insights into the nature of strategic thought can be elucidated by games puzzles and diversions originally written in german and published by vieweg verlag this ams edition is a translation tailored for the english speaking reader it offers an intriguing look at myths and paradoxes through the lens of game theory bringing the mathematics into sharper focus at the same time this book is a must for those who wish to consider game theory from a different perspective one that embraces science literature and real life conflict the game s afoot would make an excellent book for an undergraduate course in game theory it can also be used for independent study or as supplementary course reading the connections to literature films

and everyday life also make it highly suitable as a text for a challenging course for non majors its refreshing style and amusing combination of game theoretic analysis and cultural issues even make it appealing as recreational reading

it took me over five years to write this book finishing my research project and thus finishing this book would not have been possible without the help of many friends of mine thus the first thing to do is to say thanks a lot this means at first place the evangelisches studienwerk haus villigst they gave me a grant for my work thus laying the important financial grounds of everything i ve done there is such a large number of friends i worked and lived with over the last few years that i cannot possibly mention them all by name but i ll try anyway so thanks christiane gilbert maik karl and everybody else feeling that his or her name should appear in this list and of course thanks franz haslinger for letting me do whatever i wanted to and for even encouraging me to stick with it one more thing i d like to mention although this work is based on very heavy use of computer power it is my special pride to say that not a single penny i e deutschmark had to be spent for software in order to do this work instead all that has been done has been done by free software thus i would like to mention some of my most heavily used software tools in order to let you the reader know that nowadays you don t depend on big commercial software packages any more

cooperative models in international relations michael d intriligator and urs luterbacher cooperation problems in international relations research have been associated with a variety of approaches game theoretical and rational choice perspectives have been used extensively to analyze international conflict at a bilateral two actor level problems of deterrence and conflict escalation and deterrence maintaining and conflict dilemma solving strategies have been studied with a variety of game theoretical constructs these range from two by two games in normal form axelrod 1984 to sequential games it is obvious that the analysis of conflict solving strategies and metastrategies deals implicitly and some times explicitly with cooperation the emphasis on cooperation promoting strategies plays therefore an important role within rational choice analysis of two actor problems however problems of international cooperation have also been traditionally associated with literary and qualitative approaches this is especially true for studies carried out at a multilateral or systemic level of analysis the association between cooperation problems at the international level and the study of international organizations influenced by the international legal tradition have certainly contributed to this state of affairs the concept of international regime of cooperation krasner 1983 which derives itself from legal studies has been developed entirely within the context of this literary 1 2 cooperative models in international relations research conception however as such studies evolved various authors tended to use more formal constructs to justify their conclusions and to refine their analyses
