social well being and enjoyment of living the health services based on phc include among other things education concerning prevailing health problems and the methods of preventing and controlling them promotion of food supply and proper nutrition material and child care including family planning immunization against the major infectious diseases prevention and control of locally endemic and epidemic diseases and provision of essential drugs and supplies the provision of health care at phc level is largely the responsibility of local governments with the support of state ministries of health and within the overall national health policy private medical practitioners also provide health care at this level
