developments in both computer hardware and perhaps the greatest impact has been felt by the software over the decades have fundamentally education community today it is nearly changed the way people solve problems impossible to find a college or university that has technical professionals have greatly benefited not introduced mathematical computation in from new tools and techniques that have allowed some form into the curriculum students now them to be more efficient accurate and creative have regular access to the amount of in their work computational power that were available to a very exclusive set of researchers five years ago this maple v and the new generation of mathematical has produced tremendous pedagogical computation systems have the potential of challenges and opportunities having the same kind of revolutionary impact as high level general purpose programming comparisons to the calculator revolution of the languages e g fortran basic c 70 s are inescapable calculators have application software e g spreadsheets extended the average person s ability to solve computer aided design cad and even common problems more efficiently and calculators have had maple v has amplified our arguably in better ways today one needs at mathematical abilities we can solve more least a calculator to deal with standard problems problems more accurately and more often in in life budgets mortgages gas mileage etc specific disciplines this amplification has taken for business people or professionals the excitingly different forms

cynthia young's algebra trigonometry fourth edition will allow students to take the guesswork out of studying by providing them with a clear roadmap what to do how to do it and whether they did it right while seamlessly integrating to young's learning content algebra trigonometry fourth edition is written in a clear single voice that speaks to students and mirrors how instructors communicate in lecture young's hallmark pedagogy enables students to become independent successful learners varied exercise types and modeling projects keep the learning fresh and motivating algebra trigonometry 4e continues young's tradition of fostering a love for succeeding in mathematics

in this careful articulation of science the editors provide an intellectual marriage of indigenous science and science education in the african context as a way of revising schooling and education they define science broadly to include both the science of the natural physical biological and the science of the social it is noted that the current policy direction of african education continues to be a subject of intense intellectual discussion science education is very much at the heart of much current debates about reforming african schooling among the ways to counter vision contemporary african education this book points to how we promote indigenous science education to improve upon african science and technology development in general the book also notes a long standing push to re examine local cultural resource knowings in order to appreciate and understand the nature content and context of indigenous knowledge science as a starting foundation for promoting african science and technology studies in general it is argued that these interests and concerns are not mutually exclusive of each other but as a matter of fact interwoven and interdependent the breadth of coverage of the collection reflect papers in science indigeneity identity and knowledge production and the possibilities of creating a truly african centred education it is argued that such extensive coverage will engage and excite readers on the path of what has been termed african educational recovery while the book is careful in avoiding stale debates about the eurocentricity of western scientific knowledge and the positing of eurocentric science as the only science worthy of engagement it nonetheless cautions against constructing a binary between indigenous local science and knowledges and western scientific knowledge after all western scientific knowledge is itself a form of local knowledge born out of a particular social and historical context engaging science in a more global context will bring to the fore critical questions of how we create spaces

for the study of indigenous science knowledge in our schools how is indigenous science to be read understood and theorized and how do educators gather collect and interpret indigenous science knowledges for the purposes of teaching young learners these are critical questions for contemporary african education
