based on an ethnographic account of subsistence use of amazonian forests by wapishana people in guyana edges frontiers fringes examines the social cultural and behavioral bases for sustainability and resilience in indigenous resource use developing an original framework for holistic analysis it demonstrates that flexible interplay among multiple modes of environmental understanding and decision making allows the wapishana to navigate socio ecological complexity successfully in ways that reconcile short term material needs with long term maintenance and enhancement of the resource base

the idea that the caribbean could be devolving downward in wealth function and sovereignty has become a recurrent theme in both academic and popular literature by focusing on some of the current issues facing caribbean nation states the editors and contributors to this volume hope to

inform and contribute to the ongoing debate on the broad themes of sovereignty and development and the prospects for survival of caribbean nation states in a globalised world while some of the papers seek to describe and analyse the range and complexity of the challenge to national sovereignty and public policy autonomy others focus on issues relating to small country size gender and ethnic tensions security constitutional reform and regional integration the result is a balanced perspective the contributors do not gloss over the problem faced by the region at the same time they do not present a hyper pessimistic picture of caribbean development prospects what gives the collection a particular dynamism is the way in which the authors have challenged the terrain of political possibilities traditionally defined for small peripheral societies

first published in 1998 this volume uses guyana as an excellent comprehensive case study to examine various sectors operations effects upon the environment and the ways in which the sector can impact upon the vitality and development potential of other sectors the authors attempt to demonstrate how it is possible to adjust current sectoral activities for improved resource utilisation they begin in the interior looking at mining and forest resource exploitation attention then moves towards the coast looking at agriculture fishing human settlement and service provision a review of industry transport and energy follows before examining biodiversity tourism and the amerindian community finally a detailed analysis is presented of the challenges to be faced in devising a sustainable development national strategy

the distinguished environmentalists in this collection offer an in depth analysis and call to advocacy for community based natural resource management cbnrm their overview of this transnational movement reveals important links between environmental management and social justice agendas for sustainable use of resources by local communities in this volume leaders who have been instrumental in creating and shaping cbnrm describe their model programs the countermapping movement and collective claims to land and resources legal strategies for gaining rights to resources and territories biodiversity conservation and land stabilization priorities and environmental justice and minority rights this book will be of value to instructors practitioners and activists in anthropology cultural geography environmental justice environmental policy political ecology indigenous rights conservation biology and cbnrm
