through examination of the death penalty in literature  
aaron aquilina contests heidegger s concept of being towards death and proposes a new understanding of the political and philosophical subject  
dickens nabokov hugo sophocles and many others explore capital punishment in their works from antigone to invitation to a beheading using these varied case studies  
aquilina demonstrates how they all highlight two aspects of the experience first they uncover a particular state of being or more precisely non being that comes with a death sentence and second they reveal how this state exists beyond death row as sovereignty and alterity are by no means confined to a prison cell in contrast to heidegger s being towards death which individualizes the subject only i can die my own death supposedly this book argues that when condemned to death the self and death collide putting under erasure the category of subjectivity itself be it death row or not when the supposed futurity of death is brought into the here and now we encounter what aquilina calls relational death living on with death severs the subject s relation to itself the other and political sociality as a whole rendering the human less a named and recognizable being than an anonymous living corpse a human thing in a sustained engagement with blanchot levinas begel agamben and derrida the ontology of death articulates a new theory of the subject beyond political subjectivity defined by sovereignty and beyond the heideggerian notion of ontological selfhood

in the early 1950s german philosopher martin heidegger proclaimed the austrian expressionist georg trakl to be the poet of his generation and of the hidden occident trakl a guilt ridden lyricist who died of a cocaine overdose in the early days of world war i thus became for heidegger a redemptive successor to hlderlin drawing on derrida s geschlecht series and substantial archival research dialogue on the threshold explores the productive and problematic tensions that pervade heidegger s reading of trakl and reflects more broadly on the thresholds that separate philosophy from poetry gathering from dispersion the same from the other and the native from the foreigner ian alexander moore examines why heidegger was reluctant to follow trakl s invitation to cross these thresholds even though his encounter with the poet did compel him to take up in astounding ways many underrepresented topics in his philosophical corpus such as sexual difference pain animality and christianity a contribution not just to heidegger and trakl studies but also more modestly to the old quarrel between philosophy and poetry dialogue on the threshold concludes with new translations of eighteen poems by trakl

is there a world out there independent of the way we experience it think of it or talk about it if so can we know how it is these questions have been a central concern of philosophy throughout most of its history and they continue to be the subject of an intense debate between realists and antirealists in this clearly written and comprehensive book s ren harnow klausen presents an argument for realism about the external world but also attempts to take the antirealist challenge seriously a sensible realist must acknowledge the force of the skeptical objections and avoid overstating her own case the book covers a wide range of themes from the historical origins of antirealism and the views of berkeley kant husserl and the logical positivists to the most recent developments in epistemology and relevant empirical research in psychology anthropology and linguistics topics also include the definition of realism and its relationship to semantics and theories of truth the prospect of providing a transcendental argument for realism inference to the best explanation externalist theories of justification the basis of our understanding of mind independent reality the relevance of evolutionary biology to the realism issue and theories of intentionality and perception

this book explores the concept of academic freedom from a european vantage point drawing on both philosophical and legal perspectives the editors and contributors analyse the concept of academic freedom within the present institutional setting academic freedom has long been considered a natural part of higher education but as the world enters the digital age a renewed understanding of its role and the threats it must face is required the authors question the purpose of science without freedom and subsequently the purpose of political communities without free science although the book uses european case studies to answer these questions it undoubtedly has global relevance what would be left of the present notion of the global world were we to conceive of its character without modern science this book calls for a critical re examination of the academic community and its own understanding of the sources conditions and aims of scientific practice
