this book is a distillation of the first annual international technical workshop on climate risk held in 2016 in wells maine usa it is organized into four major themes

namely the montreal protocol industry and infrastructure concerns sustainability and strategic planning and climate science and informing business risk the volume s premise is that long before the 2015 paris agreement many professionals from diverse fields were working to solve the problems of human caused climate change the 1987 montreal protocol is now in support of a key emission reduction goal of the agreement it was time for the seasoned leaders who implement the protocol the world s most successful treaty for atmospheric protection to share their knowledge and wisdom with the next generation before that expertise was lost the purpose of bringing these communities of practice together is to leverage the many successes to date to inspire future innovations through lessons learned ensure that new or updated regulations are timely communicated and economically executed and identify opportunities for related sustainable development

do you need guidelines for choosing a substitute organic solvent that is safer to use do you need an effective cheap but perhaps temporary way to reduce exposures before you can convince your employer to spend money on a long term or more reliable solution do you need information about local exhaust ventilation or personal protective equipment like respirators and gloves industrial hygiene control of airborne chemical hazards provides the answers to these questions and more science based and quantitative the book introduces methods for controlling exposures in diverse settings focusing squarely on airborne chemical hazards it bridges the gap between existing knowledge of physical principles and their modern application with a wealth of recommendations techniques and tools accumulated by generations of ih practitioners to control chemical hazards provides a unique comprehensive tool for facing the challenges of controlling chemical hazards in the workplace although william popendorf has written the book at a fundamental level he assumes the reader has some experience in science and math as well as in manufacturing or other work settings with chemical hazards but is inexperienced in the selection design implementation or management of chemical exposure control systems where the book is quantitative of course there are lots of formulae but in general the author avoids vague notation and long derivations
