guns have never been as prevalent in american culture as they are at this moment most contemporary conversations on guns either highlight the gun as just a tool used in mass killings or a right to be fiercely defended eventually whatever progress these debates foster in the public conversation tend to halt altogether once the old cliché guns don t kill people people kill people is trotted out these gun control and gun violence discussions take the gun as passive object ignoring the changing effects and the very agency that guns may deploy as politicized objects what happens if we reset the conversation and admit that guns and not the people behind them kill people the lives of guns offers a new and compelling way of thinking about the role of the gun in our social and political lives in gathering ideas from law science studies sociology and politics each chapter turns the stale standard gun conversations around by investigating the gun as an object with agency in approaching guns from a technological perspective down to the very science of how they are created and how they fire the lives of guns takes up a number of questions such as how does the presence of these objects shape civic ideology what does it mean to develop and care for gun and gun accessories technology what do guns mean to those

who build them versus those who fight for and against them what could happen when drone technology meets gun technology in bringing together fresh perspectives from leading lawyers political scientists and historians the lives of guns promises to move the gun debate forward by opening up new ways of thinking about these issues and broadening the scope of these perennial debates
