human populations to a skilled analyst tell a dramatic story in what direction is a country headed what are its strengths and weaknesses its potential disaster areas its most promising human resources what do the changes observed here from the early history of singapore to the present time mean to the future of the country and the region in south asian studies which have suffered from a lack of data singapore population in transition is a major contribution it is more than the best and latest statistical study of the area the author writes with the insight of a resident observer and throws light on race and culture contacts cultural accommodation among the peoples separatism urbanization and political history

this book deals with macro and micro aspects of population change and their inter face with socio economic factors and impact it examines theoretical notions and pursues their empirical manifestations and uses multidisciplinary approaches to population change and diversity it investigates the organic nature of the relationships between socio economic factors and population change and the feedback loops that affect socio economic organisation and behaviour the book brings together material often scattered in a number of sources and disciplines that helps to understand population change and their socio economic aspects in addition to dealing with the more conventional factors in population dynamics in the form of fertility mortality and migration the book examines socio economic forces that influence them it discusses population evolving attributes that affect population characteristics and social and behaviour and impact on the environment further it deals with social organisation and pathways that lead to different social and economic development and standards of living of diverse populations

the demographic transition and its related effects of population growth fertility decline and ageing populations are fraught with controversy when discussed in relation to the global south and the modern project of development the questions and answers become more problematic population and development offers an expert guide on the demographic transition from its origins in enlightenment europe through to the rest of the

world tim dyson examines how while the phenomenon continues to cause unsustainable population growth with serious economic and environmental implications its processes have underlain previous periods of sustained economic growth helped to liberate women from the domestic domain and contributed greatly to the rise of modern democracy this accessible yet scholarly analysis will enable any student or expert in development studies to understand complex and vital demographic theory

this book has a strong theoretical focus and is unique in addressing both mortality and fertility over the full span of human history it examines the demographic transition in the change in the human condition from high mortality and high fertility to low mortality and low fertility it asks if fluctuating populations is a new phenomenon or if there has long been an inherent tendency in man to maximize survival and to control family size

this book addresses central issues related to population and sustainable development in india the second most populous country in the world using the latest available source of data in the context of the united nations 2030 sustainable development agenda it analyzes the current state of development in india in terms of economic growth social inclusion and environmental protection especially focusing on the role of population the respective chapters explore various aspects but mainly focus on promoting greater sustainability in terms of population growth child survival and economic growth as such the book will be of interest to students researchers and policymakers in the fields of population studies economics and international development

this book discusses the question of how a regional economy can develop under the influence of an ageing and declining population and how regional development policies can help make labor markets more resilient and more inclusive as the greatest impacts of demographic change and policy and fiscal challenges can be observed at the local level examples from european north american and asian regions are combined to present a comprehensive global range of strategic solutions from different policy contexts the book shows how institutions organizations and communities can enhance their pathways for sustainable development through the intelligent management of their demographic transition and offers a synthesis of valuable lessons and strategies

as a follow up to the previous four volumes of intelligent engineering systems through artificial neural networks by the same editor the present volume contains the edited versions of the technical presentations of annie 95 held november 1995 in st louis missouri the 160 some contributions are grouped into six categories artificial neural

network architectures including subsections on architectures and learning algorithms and training fuzzy neural networks and systems evolutionary programming pattern recognition adaptive control and smart engineering system design including bio medical engineering systems signal processing forecasting environmental applications machining and robotics process control monitoring and automated inspection and general engineering includes bandw photographs diagrams and charts annotation copyright by book news inc portland or

the heated malthusian bosrupian debates still rage over consequences of high population growth rapid urbanization dense rural populations and young age structures in the face of drought poverty food insecurity environmental degradation climate change instability and the global economic crisis however while facile generalizations about the lack of demographic change and lack of progress in meeting the mdgs in sub saharan africa are commonplace they are often misleading and belie the socio cultural change that is occurring among a vanguard of more educated youth even within ethiopia the second largest country at the crossroads of africa and the middle east different narratives emerge from analysis of longitudinal micro level analysis as to how demographic change and responses are occurring some more rapidly than others the book compares ethiopia with other africa countries and demonstrates the uniqueness of an african type demographic transition a combination of poverty related negative factors unemployment disease food insecurity along with positive education health and higher age of marriage trends that are pushing this ruggedly rural and land locked population to accelerate the demographic transition and stay on track to meet most of the mdgs this book takes great care with the challenges of inadequate data and weak analytical capacity to research this incipient transition trying to unravel some of the complexities in this vulnerable horn of africa country a slowly declining population growth rates with rapidly declining child mortality very high chronic under nutrition already low urban fertility but still very high rural fertility and high population resource pressure along with rapidly growing small urban places

fertility biology and behavior an analysis of the proximate determinants presents the proximate determinants of natural fertility this book discusses the biological and behavioral dimensions of human fertility that are linked to intermediate fertility variables organized into nine chapters this book begins with an overview of the mechanisms through which socioeconomic variables influence fertility this text then examines the absolute and relative age specific marital fertility rates of selected populations other

chapters consider the trends in total fertility rates of selected countries including colombia kenya korea indonesia mexico pakistan france and united states this book discusses as well the effects of deliberate marital fertility control through contraception and induced abortion the final chapter deals with the management of sex composition and implications for birth spacing this book is a valuable resource for reproductive physiologists social scientists demographers statisticians biologists and graduate students with an interest in the biological and behavioral control of human fertility
