fair warning is given to the materialists and physicalists who think we are nothing more than our brain and body degracia throws down the gauntlet and offers substantial challenges to such shallow and naive views in this provocative set of essays this collection consists of planetalk blogs from 2013 and 2014 covering a variety of topics about this and the other worlds the möbius geometry that lets us move amongst the planes is discussed as are the ten types of samadhi described by patanjali in the yoga sutras read about wilder penfield the dualist neurosurgeon and what he says about where consciousness begins and ends in the brain a toy model of epistemology is developed based on chaitin s ideas in algorithmic information theory leibniz monads and richard feynman s philosophies are discussed and so much more there s bound to be something here for everyone interested in the links between our physical and nonphysical existence

the pattern 1853 enfield rifle was the first rifled firearm issued to every soldier in the british army and gave the infantry a revolutionary increase in firepower first issued in 1853 the enfield proved itself worthy during both the crimean war and the indian mutiny where its long range durability and interchangeable parts made it a perfect campaign rifle however it was during the american civil war that the enfield saw the greatest use with over a million rifles being sold to the armies of both the north and south this title takes an in depth look at the design the history the mechanics and the use of one of the most important firearms of the 19th century

design reflects social developments in those issues which are also embraced by design researchers a key concept for how designers position themselves in the future according to

the editor's thesis may well be integrative design this term denotes design's potential for the integrative development of a society a potential imperatively linked with economic and political positions integrative design collects basic essays on aspects of integrative design including design after ownership inclusion design as an interface with society the integration of design and technology and the political agenda of design the associated website documents current and recently completed research projects that expand on these aspects

in spite of the amazing technological marvels of the modern world that have stemmed from science there is no agreed upon definition of what science is in this lively colorful and engaging work don degracia contends that science is a very weak form of what has been described for thousands of years in hindu india as samadhi samadhi is an advanced technique of raja yoga in which the meditating subject fuses with the object of meditation in a process that has been called knowing by being by understanding science as a weak form of samadhi and comparing it to the knowledge acquired from yogic practices many of the limitations of science are brought to the fore these include the link between mind and body the role of the senses as middle men between the mind and the objects of perception why mathematics is unreasonably effective for describing the physical world and how and why power is unlocked by the human mind when correct knowledge is obtained

biotechnology in the broadest sense can trace its roots back to prehistory this book is not intended to be a comprehensive history of the technology from some arbitrary point in time or even a chronological tracing of the evolution of that technology but rather my impression of the various events throughout history that have intersected or built on one another to lead to the forward progression of a technology obviously with such a broad canvas much selectivity is involved in the choices made to advance the narrative and while the subjects chosen are not capricious they are influenced by the author's perspective in addition i have made some attempt where validated resources exist to present my perspective on how individual personalities and their particular contextual experience influenced the direction in which they carried the science or the science carried them the book is divided into an introduction and five chapters which this author views as one of the many possible delineations that could be employed to trace the progress of the technology the introduction gives a broad overview of the technology the components covered progression of the science present applications and future prospects chapter one covers the prehistory which of its essence involves some conjecture in addition to supported data there are many potential starting points but i choose our agricultural roots since as noted anthropologist solomon katz asserts the domestication of plant and animals presaged civilization
