the chief focus of the book is on the symbolic and linguistic the purpose is to develop an integrated theory of architectural description and architectural intention and this includes the intention of the user as well as that of the designer insofar as architecture is an art norberg schulz is a practicing architect his buildings stand in several countries and he elucidates the nature of architectural reality with a practiced eye and from a practical viewpoint although the methods and theory that his book develops are uncompromisingly rigorous and tightly formed they are everywhere related to actual building through specific examples and through the use of over 100 photographs the structure that norberg schulz has fashioned is surely one of the most impressive intellectual edifices that any architect has ever produced the materials that are organically worked into it include gestalt psychology the mechanics of perception information theory modern analytic philosophy and in particular linguistic analysis and the general theory of signs and symbols the result however is not an eclectic hodge podge all these materials have their place and purpose none is applied extraneously for show or purely decorative effect and all this divergent material had to be joined according to plan within formal bounds in order to produce a theory with equally divergent applications one that can treat not only of the aesthetics of architecture but equally well of its social psychological and cultural effects the chief focus of the book is on the symbolic and linguistic the purpose is to develop an integrated theory of architectural description and architectural intention and this includes the intention of the user as well as that of the designer insofar as architecture is an art

this essential compendium presents more than 150 key arguments by major architectural philosophers and gurus of today and outlines the numerous developments that have taken flace in this field since the 1950s each of the statements is acocmpanied by a short biography of the architect and an extract from their principal texts drawn from a variety of sources

no detailed description available for architecture as environmental communication

agent technology or agent based approaches is a new paradigm for developing software applications it has been hailed as the next significant breakthrough in software development and the new revolution in software after object technology or object oriented programming in this context an agent is a computer system which is capable of act

this book looks at architecture history in reverse in order to follow chains of precedents back through time to see how ideas alter the course of civilization in general and the discipline of architecture in particular part i begins with present day attitudes about architecture and traces them back to seminal ideas from the beginning of the twentieth century part ii examines how pre twentieth century societies designed and understood architecture how they strove to create communal physical languages and how their disagreements set the stage for our information age practices architecture history and theory in reverse includes 45 black and white images and will be useful to students of architecture and literature
