the essential one volume resource for advanced students and academics in phonology

cilungu is an underrepresented language spoken in northern zambia and tanzania whose future is far from certain given ongoing urbanization and the ascendancy of other regional languages the product of over fifteen years of fieldwork cilungu phonology presents a comprehensive description and analysis of this endangered language featuring a reference grammar and formal analysis of cilungu this volume will be a major contribution to our understanding of tonology since several of the forty four processes analyzed appear to be unique to the language it also includes a discussion of morphology both nominal and verbal

the international congress of linguists icl takes place every five years it is the meeting where the world s leading linguists present their research and discuss the progress of their work and the state of their profession 21st icl pozna 2024 is a highlight in this series in twelve plenary lectures eighteen extensive sections and twelve focus streams two special panels and numerous workshops all theories and schools new developments and emerging sub disciplines of linguistics are discussed this book contains the plenary lectures and all

introductions to the sections and focus streams that cover special areas of interest and thus offers the state of the art of linguistics in 2024

constraint based frameworks such as optimality theory ot have significantly altered phonologists views on the nature of derivations and their role in linguistic theory earlier frameworks of generative phonology were characterized by a fairly complicated theory of derivations involving lexical levels the cycle and intrinsic and extrinsic rule ordering among other things ot in its standard form on the other hand represents a minimalist theory of derivations recognizing only a direct mapping from input to output this volume addresses questions from many different points of view by a number of outstanding scholars is this minimal theory sufficiently well equipped to deal with the empirical complications of natural language or do we need a larger derivational residue in our theory what are the relevant facts and how can we deal with them are there any reasons to think that an ot based approach to derivations may even be more successful than its rule based competitors the book also features an introduction into the general issues involved and an extensive bibliography

this study combines a descriptive and theoretical presentation of k nni a gur language of northern ghana it presents an optimality theory analysis of the entire phonological system the descriptions are separated from the formal analyses in order to facilitate use by both descriptivists and theoreticians morphology is described including the noun class system reduplicative agentive nouns noun adjective complexes nominal derivations and various verbal aspectual suffixes major sections are included on consonants vowels and tone the volume also includes a brief syntax sketch co occurrence restrictions phoneme frequency counts measurements of segment durations and vowel formants and seven appendices of data selected notes of interest some phonology is limited to only certain noun classes the 9 vowel atr vowel system and diphthongization are integrally related certain vowels assimilate only across consonants having the same place feature tonal perturbations require four different underlying representations for different nouns which have a surface lh tone true tonal polarity is distinct from dissimilation two cases of syntax phonology interface are demonstrated michael cahill ph d linguistics the ohio state university 1999 has been with sil since 1982 and worked on site with k nni speakers from 1986 to 1993 he was a member of the lsa s committee on endangered languages and their preservation from 2001 2003 chairing it in 2003 he is an adjunct faculty member of the university of texas at arlington and of the graduate institute of applied linguistics and is currently based in dallas as the

international linguistics coordinator of sil

research on current topics in linguistic theory including new theoretical developments based on the latest international discoveries

proceedings of the annual meeting of the society in v 1 11 1925 34 after 1934 they appear in its bulletin

this volume includes papers by leading figures in phonetics and phonology on two topics central to phonological theory tones and phonological features papers address a wide range of topics bearing on tones and features including their formal representation and phonetic foundation

international review of general linguistics
