how have christians over the centuries demonstrated faith worked through doubt acted with courage how can great people of faith inspire our christian journey can we really be like they were dr tyson believes we can and he offers fifteen short biographies of significant christians from various periods of history to prove it we see in their lives specific examples of faithful responses to god and how their examples of faith can be put into practice in concrete real life situations dr tyson looks at the faith of the following great people of christian faith vibia perpetua ca 181 203 athanasius of alexandria ca 296 373 augustine of hippo ca 354 430 anselm of canterbury 1033 1109 francis ca 1181 1226 and clare ca 1193 1254 of assisi thomas aquinas 1225 1274 catherine of siena 1347 1380 julian of norwich ca 1342 1423 martin luther 1483 1546 john calvin 1509 1564 john 1703 1791 and charles 1707 1788 wesley karl barth 1886 1968 dietrich bonhoeffer 1906 1945 martin luther king jr 1929 1968 and mother teresa of calcutta 1910 1997

john and george keats man of genius and man of power embodied sibling forms of romanticism george s emigration to the u s frontier created an abysm of loneliness and alienation in john that would inspire his most plangent and sublime poetry gigante s account places john s life in a transatlantic context that has eluded his previous biographers

one remarkable ability of the human brain is to process large amounts of information about our surroundings to allow us to interact effectively with them in everyday life the most common way to interact with objects is by reaching grasping lifting and manipulating them although these may sound like simple tasks the perceptual properties of the target object such as its location size shape and orientation all need to be processed in order to set the movement parameters that allow an accurate reach to grasp to lift movement several brain areas work in concert to process this outstanding amount of visual information and drive the execution of a motor plan in just a few hundred milliseconds how are these processes orchestrated in developing this type of comprehensive knowledge about the interactions between objects perception and goal directed actions we have a window into the mechanisms underlying the functioning of the visuo motor system with this research topic we aim to further understand the neural mechanisms that mediate our interactions with the world therefore we particularly encourage

submission of papers that attempt to relate such findings to real world situations by investigating behavioural and neural correlates of information processing related to eye hand coordination and visually guided actions including reaching grasping and lifting movements this topic welcomes submissions of original research using any relevant techniques and methods from behavioural kinematics kinetics to neuroimaging and transcranial magnetic stimulation tms as well as neuropsychological studies
