the authors argue that the aim of research should be to improve practice through a process of critical reflection focusing clearly on the everyday concerns and problems of practitioners they emphasize the importance of practical knowledge their definition of practice is wide and includes the generation of theory and the doing of research as well as front line teaching they show how notions of adult learning and the adult learner have been constituted mainly through theory and research in psychology and sociology and examine action research as a mode of understanding they conclude by looking at the curriculum implications for the teaching of adult education as reflective practice

chemoinformatics theory practice products is an essential handbook for determining the

right chemoinformatics method or technology to use there has been an explosion of new chemoinformatics tools and techniques each technique has its own utility scope and limitations as well as meeting resistance to use by experimentalists the purpose of chemoinformatics theory practice products is to provide computational scientists medicinal chemists and biologists with unique practical information and the underlying theories relating to modern chemoinformatics and related drug discovery informatics technologies the book also provides a summary of currently available state of the art commercial chemoinformatics products with a specific focus on databases toolkits and modelling technologies designed for drug discovery it will be broadly useful as a reference text for experimentalists wishing to rapidly navigate the expanding field as well as the more expert computational scientists wishing to stay up to date

this book is available as open access through the bloomsbury open access programme and is available on bloomsburycollections.com what is the relationship between theory and practice in the creative arts today in critical practice martin mcquillan offers a critical interrogation of the idea of practice led research he goes beyond the recent vocabulary of research management to consider the more interesting question of the emergence of a cultural space in which philosophy theory history and practice are becoming indistinguishable mcquillan considers the work of a number of writers and thinkers who cross the divide between theoretical and creative practice including alain badiou and terry eagleton and the longer tradition of theory writing that runs through the work of hannah arendt, jacques cixous, roland barthes and louis althusser his aim is to elucidate the contemporary ramifications of a relationship that has been contested throughout the long history of philosophy from plato's dialogues to derrida's envois

no 104 117 contain also the regents bulletins

part of the prentice hall series in educational innovation this concise new volume is the first book devoted entirely to describing and critiquing the various theoretical frameworks used in chemistry education science education research with explicit examples of related studies provides a broad spectrum of theoretical perspectives upon which readers can base educational research includes an extensive list of relevant references presents a consistent framework for each subject area chapter a useful guide for practicing chemists chemistry instructors and chemistry educators for learning how to do basic educational research within the context of their own instructional laboratories and classrooms
