genetic programming gp is a systematic domain independent method for getting computers to solve problems automatically starting from a high level statement of what needs to be done using ideas from natural evolution gp starts from an ooze of random computer programs and progressively refines them through processes of mutation and sexual recombination until high fitness solutions emerge all this without the user having to know or specify the form or structure of solutions in advance gp has generated a plethora of human competitive results and applications including novel scientific discoveries and patentable inventions this unique overview of this exciting technique is written by three of the most active scientists in gp see gp field guide org uk for more information on the book

this beautifully illustrated marine fish guide encompasses the singularly diverse and rich oceans from southeast asia to australia marine fishes of southeast asia contains nearly 2 000 hand painted illustrations featuring 1 635 individual species the paintings were completed over a 3 year period and are primarily based on photographs or color transparencies of either live fishes taken underwater or freshly caught specimens in many cases preserved specimens at the western australian museum have been consulted to

ensure accuracy of detail and proportions the end result is a colorful and highly comprehensive guide to the sea fishes of northern australia and the adjacent southeast asian region

this book offers investigations into the familiar world of the school grounds

veteran fiction writer a b guthrie jr offers practical advice for the would be fiction writer

poison ivy acres 250 acres of wilderness dedicated to the preservation of natural habitat has been home to carol bennett mccuaig for many years her keen powers of observation coupled with her insights into wildlife behaviour and her evocative writing style have produced this captivating collection of stories

2024 jon gjerde prize winner for best book in midwestern history after the war of 1812 and the removal of the region's indigenous peoples the american midwest became a paradoxical land for settlers even as many settlers found that the region provided the bountiful life of their dreams others found disappointment even failure and still others suffered social and racial prejudice in this broad and authoritative survey of midwestern agriculture from the war of 1812 to the turn of the twentieth century r douglas hurt contends that this region proved to be the country's garden spot and the nation's heart of agricultural production during these eighty five years the region transformed from a sparsely settled area to the home of large industrial and commercial cities including chicago milwaukee cleveland and detroit still it remained primarily an agricultural region that promised a better life for many of the people who acquired land raised crops and livestock provided for their families adopted new technologies and sought political reform to benefit their economic interests focusing on the history of midwestern agriculture during wartime utopian isolation and colonization as well as political unrest hurt contextualizes myriad facets of the region's past to show how agricultural life developed for midwestern farmers and to reflect on what that meant for the region and nation
