this book examines theoretical considerations in the study of decision making as well as practical applications in social interpersonal domains for adolescents and adults with intellectual and developmental disabilities. It provides a history of the study of decision making in individuals with IDD and examines emerging views on decision making from a positive psychology perspective. The book explores the role of decision making in self-determination as well as offers global perspectives on the rights and responsibilities of individuals with IDD to engage in independent decision making. It outlines a framework for the study of decision making in individuals with IDD, reviews research that addresses the role of culturally diverse influences on individual decision making, and examines likely consequences of the etiological bases of disability on decision making. Profiles of key areas of coverage include: critical role of basic processes of cognition, motivation, and self-beliefs; affect and emotion; and various styles of decision making. Applications of decision making skills within family and community contexts in personal and social relationships during transition to adulthood and more independent lifestyles, and in successful community living, self-protective decision making by individuals in situations of abuse, as well as in resisting peer victimization and bullying, decision making parameters for enabling maximum participation in self-decision making through shared and supported decision making in contexts such as health care, aging, and end-of-life decisions. Research-based interventions to improve effective decision making in individuals with IDD. Decision making by individuals with intellectual and developmental disabilities is a must-have reference for researchers, professors, and graduate students, as well as clinicians and other professionals in the fields of developmental and positive psychology, rehabilitation, social work, special education, occupational speech and language therapy, public health, and healthcare policy.

Typically, ASD high school graduates are unprepared for the transition to independence. Early ongoing training in the social skills crucial to establishing successful adult relationships in college, vocational school, residential living, or on the job can help. Preparing for Life guides readers through the legal, financial, educational, vocational, and community resources available after graduation. The essence of the book lies in the 73 skill lessons targeting nonverbal communication, empathy, anger, anxiety management, conversational skills, employment-related skills, which can be taught by parents, teachers, or professionals. This easy-to-follow resource offers a complete toolbox of social skills and the means to attain them.
