this atlas shows the relationship between water pollution and cancer in the huai river basin in china over the last 30 years drawing on a five year study conducted by the china centre for disease control cdc professor gonghuan yang dafang zhuang present a spatial and longitudinal analysis of regular pollution monitoring and disease surveillance data a review of variation in trends in the causes of death in the huai river basin over the past 30 years shows that precisely those areas which were the most seriously polluted for the longest time were the areas with the highest increase in digestive cancer deaths several times that of the national average increase for the respective cancers spatial analysis shows a high level of correspondence between the seriously polluted areas and areas with high mortality from cancer the most important finding in the atlas dr gonghuan yang is a professor at the institute of basic medical sciences chinese academy of medical sciences she serves as director of the center of ncd brfs of the institute of basic medical sciences chinese academy of medical science beijing china she is an expert on public health and an epidemiologist focusing on chronic non communicable diseases dr dafang zhuang is a professor at the institute of geographical sciences and natural resources research chinese academy of sciences beijing china he is an expert of geographical information system and its application in correlating public health with environmental changes

this is a multi author volume resulted from an international conference focusing on topics related to our understanding of the role of china in the global history apart from introductory chapters exploring methodological issues and providing big pictures of framing china in the world in particular time zones this volume also covers rich discussions on the following themes from the ancient period to the twentieth century organized water transport cultural interactions navigators port cities smuggling activities customs service foreign relations migration and diasporas written by scholars of different generations who are based in diverse regions including canada hong kong japan singapore taiwan the uk and the us the chapters in this volume either address old questions from new perspectives or table new

topics that were largely ignored in previous scholarship some go further to brainstorm possible research directions in the future this thought provoking volume will be beneficial to readers who are interested in rethinking china s position in the global historical stage against the backdrop of post orientalism

the phenomenon of cancer villages has emerged in many parts of rural china drawing media attention and becoming a fact of social life however the relationship between pollution and disease is often hard to discern through sociological analysis of several villages with different social and economic structures the authors offer a comprehensive historically grounded analysis of the coexistence between the incidence of cancer environmental pollution and villagers lifestyles as well as the perceptions claims and responses of different actors they situate the appearance of cancer villages in the context of social economic and cultural change in china tracing the evolution of the issue over two decades and providing deep insights into the complex interactions and trade offs between economic growth environmental change and public health
