mechanics of machines is designed for undergraduate courses in kinematics and dynamics of machines it covers the basic concepts of gears gear trains the mechanics of rigid bodies and graphical and analytical kinematic analyses of planar mechanisms in addition the text describes a procedure for designing disc cam mechanisms discusses graphical and analytical force analyses and balancing of planar mechanisms and illustrates common methods for the synthesis of mechanisms each chapter concludes with a selection of

problems of varying length and difficulty si units and us customary units are employed an appendix presents twenty six design projects based on practical real world engineering situations these may be ideally solved using working model software

this book follows the previously published title solving large scale problems in mechanics edited by m papadrakakis this first volume to be published in the wiley series in solving large scale problems in mechanics is devoted to high performance computing using the new generation of computers with parallel and distributed computing capabilities parallel and distributed processing is a rapidly growing area of high technology where engineering applications lagged behind hardware advances new algorithms and codes are required in order to exploit effectively modern computer architectures as programs suitable for conventional computers achieve very modest performances on these new machines there is therefore an urgent need to develop and test powerful solution and data handling techniques capable of exploiting the potential of modern computers and of accomplishing the solution of complex engineering problems in an acceptable computing time this volume intends capturing the latest developments in the field and to serve as an essential reference book on the subject it comprises a comprehensive state of the art treatment of theory and practice illustrated by extensive numerical examples

includes list of members 1882 1902 and proceedings of the annual meetings and various supplements
