Stamos Steven E. Landsburg Mark Vernon Harriet Swain Eleanor White Simon Blackburn Fred Watson K. S. Ramanujam Marjorie Hardy Simon Blackburn*

a leading western buddhist scholar and author of *Awakening the Buddha* offers a series of reflections and insights that challenge readers to develop individual authentic responses to some of life's most provocative questions from what is my purpose in life to what happens after i die

the big questions series is designed to let renowned experts address the 20 most fundamental and frequently asked questions of a major branch of science or philosophy each 3000 word essay simply and concisely examines a question that has eternally perplexed enquiring minds and provides answers from history's great thinkers this ambitious project is a unique distillation of humanity's best ideas

this book is an investigation into one man's look into the greatest questions of life it begins with the idea of how we can know if there is a god if there is a god then several of the next big questions will be answered by what that god is like and how he has disclosed himself to humanity

can religious beliefs survive in the scientific age are they resoundingly outdated or is there something in them of great importance even if the way they are expressed will have to change given new scientific context these questions are among those at the core of the science religion dialogue an anglican priest who was once an atheist offers compelling insights into the often contentious relationship between diverse religious views and new scientific knowledge he identifies ten basic questions about the nature of the universe and human life among these are does the universe have a goal or purpose do the laws of nature exclude miracles can science provide a wholly naturalistic explanation for moral and religious beliefs has science made belief in god obsolete are there any good science based arguments for god ward considers concepts from buddhism confucianism taoism islam hinduism judaism and christianity while featuring the speculations of cosmologists physicians mathematicians and philosophers

evolution and the big questions david n stamos's evolution and the big questions delivers what its title promises you get to look at all of the issues

such as race and ethics and religion that make the study of evolution so interesting and more than just a science the book is written in a clear and friendly manner and deserves a very wide readership michael ruse florida state university this provocative text considers whether evolutionary explanations can be used to clarify some of life's biggest questions it offers a lively informative and timely look at a wide variety of key issues facing all of us today including questions of race sex gender the nature of language religion ethics knowledge consciousness and ultimately the meaning of life some of the questions examined are did evolution make men and women fundamentally different is the concept of race merely a social construction is morality including universal human rights a mass delusion can religion and evolution really be harmonized does evolution render life meaningless designed for students and anyone with an interest in the relationship between evolutionary heritage and human nature the text takes an interdisciplinary approach and offers direction for further reading and research each chapter presents a main topic together with discussion of related ideas and arguments from various perspectives along the way it poses life's biggest questions pulling no punches and presenting a challenge to thinkers on all levels

in the wake of his enormously popular books the armchair economist and more sex is safer sex steven landsburg uses concepts from mathematics economics and physics to address the big questions in philosophy what is real what can we know what is the difference between right and wrong and how should we live widely renowned for his lively explorations of economics in his fourth book landsburg branches out into mathematics and physics as well disciplines that like economics the author loves for their beauty their logical clarity and their profound and indisputable truth to take us on a provocative and utterly entertaining journey through the questions that have preoccupied philosophers through the ages the author begins with the broadest possible categories reality and unreality knowledge and belief right and wrong and then focuses his exploration on specific concerns from a

mathematical analysis of the arguments for the existence of god to the real meaning of the heisenberg uncertainty principle and the godel incompleteness theorem to the moral choices we face in the marketplace and the voting booth stimulating illuminating and always surprising the big questions challenges readers to re evaluate their most fundamental beliefs and reveals the relationship between the loftiest philosophical quests and our everyday lives

can the existence of god be proved by reason alone has scientific discovery destroyed the intellectual basis for religion does the presence of evil in the world mean that god does not care about us and why does fundamentalism flourish in an age of progress in big questions god mark vernon addresses these and many more perennial dilemmas drawing on physics and philosophy spiritual traditions and religious experience he explores the place of religion in relation to science in making sense of evil in understanding history and in explaining value asking the big questions again for himself he finds new areas of thought and perception big questions god is a subtle but compelling argument for the necessity of a spiritual dimension in modern society and offers profound insights on humanity s constant battle to make sense of the transcendent

what wins wars why do empires rise and fall what makes a great leader what causes nationalism how do spiritual movements spread these are questions in the forefront of our minds today but they meant just as much to people in the past how did earlier generations tackle them and how far can historians use the lessons of the past to help to find some answers drawing on examples ranging from ancient greece to tony blair s britain leading historical thinkers address 20 of the really big questions that have been asked over the centuries about the course of human events while richard evans asks what history is ian kershaw considers how personality affects politics lisa jardine looks at the impact of technology on social change felipe fernández armesto measures the influence of geography david a bell assesses what causes nationalism and colin renfrew considers how civilisations

develop others examine why revolutions happen how spiritual movements spread why economies collapse how intellectual movements start and what impact our physical bodies and our private lives have on changing history each essay is accompanied by commentary by a journalist discussing the differing views of other leading thinkers today and in the past the result is a stimulating ride over continents and across centuries in search of answers that are sometimes surprising often controversial and all of great relevance to how we live today

pedagogy with heart is a dynamic teaching guide for new and trainee secondary english teachers it delves into the core principles of english instruction offering strategies to enhance oracy reading and writing with a focus on practical application and teacher wellbeing it empowers educators to master their craft and teach confidently
