this book constitutes an attempts to show from a slightly different perspective related to literature the power of fuzzy logic as an effective and efficient tool to deal with problems and challenges faced by such human centric fields of science and knowledge humanities and sciences are of two basic cultures of modern society they are intertwined and give rise to a unified and coherent system fuzzy sets and fuzzy logic have been applied mainly in technical scientific fields much less so in the humanities and social psychological cognitive etc sciences there are very good reasons for considering this book from the perspective of fuzzy set theory the first and foremost reason is that the founder of the theory of fuzzy logic l zadeh wished that the principles of the theory of fuzzy logic be initially applied to all kinds of human centric sciences notably social economic psychological cognitive etc sciences characterized by unstructured information another reason is tracking the formation of our ancient ancestor s mindware in the epos the book of dede korkut and seeking an answer to the question how much inclination is there towards tolerance and democratic approach in this mindware by using fuzzy logic we hope that this book is interesting for the scholars studying application of fuzzy logic in all human centric sciences exemplified by humanistic social cognitive etc sciences as well as artificial intelligence natural language processing and linguistic summarization
