the lexman spacedrive gave man the stars but at a fantastic price interstellar exploration colonisation and trade became things of reality the benefits to earth were enormous but because of the fitzgerald contraction a man who shipped out to space could never live a normal life on earth again travelling at speeds close to that of light spacemen lived at an accelerated pace a nine year trip to alpha centauri and back seemed to take only six weeks to men on a spaceship when they returned their friends and relatives had aged enormously in comparison old customs had changed even the language was different alan was a spacer just like his whole family until suddenly and without intending to he in turn jumped ship and remained on earth there were times he regretted that earth was a bewildering and utterly hostile place to stay alive he had to play a ruthless game and he couldn t even find anyone to tell him the rules first published in 1958

this book emphasizes software design as the most important topic in modern robotics and demonstrates practical code examples in python and c the book introduces the free simulation system eyesim in combination with eyebot robots which can be built from inexpensive embedded processors sensors and motors or by adapting the control inputs of model cars eyesim is a free software for macos windows and linux which uses a realistic physics simulation engine and is source code compatible to the eyebot mobile robots so each robot program can first be tested on the simulator before running it on a real robot eyesim includes modules for driving walking swimming and diving robots as well as for robot manipulators eyesim also runs on the meta oculus quest providing a fully immersive robotics experience in virtual reality beginning with simple driving algorithms and sensor data processing for distance sensors lidar and camera the book progresses to more complex localization and navigation tasks as well as vision based navigation and genetic algorithms it concludes with artificial intelligence applications for mobile robots in traffic scenarios and full size autonomous vehicles this book is suitable as a text for undergraduate and graduate courses in robotics automation and artificial intelligence as well as a self study guide for practitioners and hobbyists all robot application programs in this book are available as free downloads for macos windows linux and raspberry pi os

in this book the author stresses software as the most important topic in modern robotics in particular the book concentrates on

software for mobile robots and the author demonstrates how inexpensive solutions can be constructed by mounting raspberry pi controllers and cameras onto model cars or other simple mechanical drive systems he introduces eyesim vr a freely available system that can realistically simulate driving swimming diving and walking robots the emphasis throughout is on algorithm development and all software assignments can run on real robot hardware as well as on the simulation system presented the book is suitable for undergraduate and graduate courses in artificial intelligence and robotics and also for self study by practitioners all software used in this book including all example programs can be freely downloaded online with native applications for macos windows linux and raspberry pi

beaders are always seeking new ways to create complex effects and sophisticated looks for their beadwoven creations in lush layered beadweaving experienced teacher and designer marcia balonis breaks down the process of layering beads into easy to make designs each of the 20 jewelry projects starts with a layer of beads that serves as the base balonis instructs jewelry makers to stitch layers of beads to the base to create gorgeous dimension and texture the projects make the most of beaders favorite materials including multi hole beads seed beads pearls crystals and glass balonis has a well developed sense of color and utilizes numerous different colors and shades into her projects each project includes clear step by step instructions and photos experienced beadweavers will love marcia s projects that incorporate many colors intriguing ideas and lush designs and will want to make them all

understanding everyday communicative interactions is a unique text that uses a situated discourse analysis sda framework to examine basic human communication and the interactions of those with communicative disorders in everyday and clinical settings the book introduces sda as a theoretical and empirical approach for examining the complexities of communicative interaction it explores how people collaborate in everyday contexts to communicate successfully and how they learn to do so from close analysis of a pretend game played by two children and their father to an observation of a man with aphasia and his family at a football match the present volume offers rich portraits of communicative lives and illustrates the applications of sda the final part of the

book uses sda methods to demonstrate how clinicians can function as communication partners even during assessments and can design rich communicative environments for therapeutic interventions in explaining the sda framework and equipping readers with the tools to understand the nature of human communication this sophisticated and engaging book will be an essential reference for students researchers and clinicians in communication sciences and disorders
