police analysis and planning for homicide bombings is oriented toward planning police operations in the public sector but will be usable by other public officials as well as by some military and private sector police operations it addresses police threat assessment of vulnerability assessment to defense against and response to attacks by homicide bombs it begins with an essay on the distinctions between military and police operations and includes an examination of the u s counter terrorist policy and structure assessment of explosive weapons of mass destruction and the terrorist ability to make and use them the legal limitations of police response operations in the united states and defensive response to this form of attack it concludes with commentary on actions that may be needed if this threat continues to develop in the united states relying upon both experience and research the author has synthesized the varied military law enforcement and private security approaches into a detailed analysis of the threat posed by terrorist use of homicide bombs and the

necessary internal response with the first hand experience of applying the knowledge in an actual threat environment the combination of historical perspective and reality confrontation produces an effective examination of the topic for the police administrator and emergency planner

economic development of any nation is possible only if the environmental protection laws are followed seriously wastes if not treated effectively may harm public health leading to the deterioration of ecosystem and ultimately to the growth and economy of the nation the coverage of both solid waste as well as liquid waste management in a single volume makes this book unique it discusses various economical methods to manage wastes providing a practical approach to the book it gives the knowledge of important techniques for converting wastes into the products useful for the mankind and also informs readers about the indian legal framework relating to the solid and liquid waste management the technologies explained in the book are field tested and have been practically implemented either in india or the united states hence these techniques are highly viable for communities and industries to improve their waste management practices blending theory and practices of waste management the authors provide extensive case studies from their on job experiences to exemplify how solid and liquid wastes can be managed successfully the chapter on municipal waste management exclusively covers the technologies applied to convert construction and demolition wastes and organic wastes into useful products with the increase in electronic wastes a chapter on electronic waste management has found place in the book besides the text covers management of plastic wastes biomedical wastes radioactive wastes hazardous wastes and also operations and maintenance of the treatment facilities the chapter on liquid waste management is focused on municipal wastewater and common effluent treatment plant for industrial wastewater the review questions at the end of each chapter help students to assess their knowledge and develop self efficacy in the subject whereas the appendices provide performance evaluation of solid waste management systems and sewage treatment plants numerical problems for practice and glossary of important terms the book primarily caters to the needs of undergraduate and postgraduate courses on environmental science and engineering energy and environmental engineering environmental engineering and management municipal solid waste management besides it provides practical information to environmental professionals and to the students of industrial management civil engineering and biotechnology

the application and interpretation of the four geneva conventions of 1949 and their two additional protocols of 1977 have developed significantly in the sixty years since the international committee of the red cross icrc first published its commentaries on these important humanitarian treaties to promote a better understanding of and respect for this body of law the icrc commissioned a comprehensive update of its original commentaries its preparation was coordinated by jean marie henckaerts icrc legal adviser and head of the project to update the commentaries the first convention is a foundational text of international humanitarian law it contains the essential rules on the protection of the wounded and sick those assigned to their care and the red cross and red crescent emblems this article by article commentary takes into account developments in the law and practice to provide up to date interpretations of the convention the new commentary has been reviewed by humanitarian law practitioners and academics from around the world it is an essential tool for anyone working or studying within this field

includes selected papers from meetings of the society and of its sections
