gila sher approaches knowledge from the perspective of the basic human epistemic situation the situation of limited yet resourceful beings living in a complex world and aspiring to know it in its full complexity what principles should guide them two fundamental principles of knowledge are epistemic friction and freedom knowledge must be substantially constrained by the world friction but without active participation of the knower in accessing the world freedom theoretical knowledge is impossible this requires a grounding of all knowledge empirical and abstract in both mind and world but the fall of traditional foundationalism has led many to doubt the viability of this classical project the book challenges this skepticism charting a new foundational methodology foundational holism that differs from others in being holistic world oriented and universal i e applicable to all fields of knowledge using this methodology epistemic friction develops an integrated theory of knowledge truth and logic this includes i a dynamic model of knowledge incorporating some of quine s revolutionary ideas while rejecting his narrow empiricism ii a substantivist non traditional correspondence theory of truth and iii an outline of a joint grounding of logic in mind and world the model of knowledge subjects all disciplines to robust norms of both veridicality and conceptualization the correspondence theory is at once robust universal and flexible allowing multiple patterns of correspondence including complex and indirect patterns logic s systematic grounding brings it in line with other disciplines without neglecting its strong necessity generality and normativity which are explained by its semantic formality
