sex sexuality law and in justice covers a wide range of legal issues associated with sexuality gender reproduction and identity these are critical and sensitive issues that law enforcement and other criminal justice professionals need to understand the book synthesizes the literature across a wide breadth of perspectives exposing students to law psychology criminal justice sociology philosophy history and where relevant biology to critically examine the social control of sex gender

and sexuality across history specific federal and state case law and statutes are integrated throughout the book but the text moves beyond the intersection between law and sexuality to focus just as much on social science as it does on law this book will be useful in teaching courses in a range of disciplines especially criminology and criminal justice history political science sociology women and gender studies and law

the book deals with tax planning with holding companies located in europe asia of the caribbean it analyses the problem of repatriating u s profits from europe going far beyond the routing of income via different companies instead the approach includes an analysis of the interdependencies between international tax competition holding company regimes and tax planning concepts in order to establish a basis for tax planning measures regardless of the fast changing legal environment for holding companies in the different countries

global warming and human induced climate change are perhaps the most important scientific issues of our time these issues continue to be debated in the scientific community and in the media without true consensus about the role of greenhouse gas emissions as a contributing factor evidence based climate science data opposing co2 emissions as the primary source of global warming objectively gathers and analyzes scientific data concerning patterns of past climate changes influences of changes in ocean temperatures the effect of solar variation on global climate and the effect of co2 on global climate to clearly and objectively present counter global warming evidence not embraced by proponents of co2 an unbiased evidence based analysis of the scientific data concerning climate change and global warming authored by 8 of the world s leading climate scientists each with more than 25 years of experience in the field extensive analysis of the physics of co2 as a greenhouse gas and its role in global warming comprehensive citations references and bibliography adaptation strategies are presented as alternative reactions to greenhouse gas emission reductions

this book aims to develop theoretical frameworks of the phenomena of internationalisation and globalisation and identify related ethical moral political and economic issues facing mathematics and science educators it provides a wide representation of views some of which are not often represented in international publications this is the first book to deal with issues of globalisation and internationalisation in mathematics and science education

it's become an article of faith that American entrepreneurship is in trouble. The problems are many: lack of capital, too few entrepreneurial immigrants, excessive regulation, an aging population slowing population growth, and rising student debt. But while experts across the country debate the causes and propose solutions, Scott Shane explains that the data just do not fit. Dismantling each of the most widely accepted theories in turn, he persuasively demonstrates that while an evolving market is changing the nature of most startups, entrepreneurship is actually alive and well. Shane reveals how the number of incorporated startups is rising, fewer startups are failing, and the number of businesses backed by investors is increasing. The overall picture is positive, exhaustively researched, and compellingly told. This book will be read and discussed for years to come.

an international journal of materials characterization

There has been considerable research and authorship on child sexual abuse, however much of this research has focused on adult perpetrators and child victims. Less attention has been paid to children's harmful sexual behaviour and the multitude of influences. Harmful sexual behaviour in young children and pre-teens provides evidence-based understanding on typical sexual development versus harmful sexual behaviour, the prevalence and impacts associated with harmful sexual behaviour, Australian laws, policies, and educator responsibilities, responses, and support systems for children who display harmful sexual behaviour, and the implications and challenges for future practice. This book provides understandings that directly respond to the recent Australian Royal Commission into institutional responses to child sexual abuse, recommendation 10.1 to address a primary prevention strategies to educate family, community members, carers, and professionals about preventing harmful sexual behaviours; b) secondary prevention strategies to ensure early intervention when harmful sexual behaviours are developing; and c) tertiary intervention strategies to address harmful sexual behaviours. The authors present a review of psychological, sociological, legal, and educational research to inform and support professionals involved in the wellbeing and education of children to understand, manage, and reduce dysfunctional sexual development in children.

The bestselling environmental health text with all new coverage of key topics. Environmental health from global to local is a comprehensive introduction to the subject and a contemporary authoritative text for students of public health, environmental health, preventive medicine, community health, and environmental studies. Edited by the former director of the CDC's National

center for environmental health and current dean of the school of public health at the university of washington this book provides a multi faceted view of the topic and how it affects different regions populations and professions in addition to traditional environmental health topics air water chemical toxins radiation pest control it offers remarkably broad cross cutting coverage including such topics as building design urban and regional planning energy transportation disaster preparedness and response climate change and environmental psychology this new third edition maintains its strong grounding in evidence and has been revised for greater readability with new coverage of ecology sustainability and vulnerable populations with integrated coverage of policy issues and with a more global focus environmental health is a critically important topic and it reaches into fields as diverse as communications technology regulatory policy medicine and law this book is a well rounded guide that addresses the field s most pressing concerns with a practical bent that takes the material beyond theory explore the cross discipline manifestations of environmental health understand the global ramifications of population and climate change learn how environmental issues affect health and well being closer to home discover how different fields incorporate environmental health perspectives the first law of ecology reminds is that everything is connected to everything else each piece of the system affects the whole and the whole must sustain us all for the long term environmental health lays out the facts makes the connections and demonstrates the importance of these crucial issues to human health and well being both on a global scale and in our homes workplaces and neighborhoods

this journal attempts to fill a gap between the general interest press and other academic economics journals its articles relate to active lines of economics research economic analysis of public policy issues state of the art economic thinking and directions for future research it also aims to provide material for classroom use and to address issues relating to the economics profession

as albert einstein may or may not have said the hardest thing in the world to understand is the income tax indeed to follow the debate over tax reform the interested citizen is forced to choose between misleading sound bites and academic treatises taxing ourselves bridges the gap between the two by discussing the key issues clearly and without a political agenda should the federal income tax be replaced with a flat tax or sales tax should it be left in place and reformed can tax cuts stimulate the economy or will higher deficits undermine any economic benefit authors and tax policy experts joel slemrod and jon bakija lay out in accessible language what is known and not known about how taxes affect the economy offer guidelines for

evaluating tax systems and provide enough information to assess both the current income tax system and the leading proposals to reform or replace it including the flat tax and the consumption tax the fourth edition of this popular guide has been extensively revised to incorporate the latest information covering such recent developments as the bush administration's tax cuts which expire in 2011 and the alternatives proposed by the president's advisory panel on federal tax reform slemrod and bakija provide us with the knowledge and the tools including an invaluable voter's guide to the tax policy debate to make our own informed choices about how we should tax ourselves joel slemrod is paul w mccracken collegiate professor of business economics and public policy and director of the office of tax policy research at the university of michigan jon bakija is associate professor of economics at williams college and visiting associate professor of law at cornell university law school 2007 2008 as per authors 7 12 07
