active teaching and active learning strategies creating a blueprint for success is the cumulative result of a year of reflecting asking and listening to questions and comments that many have concerning the education of our youth the book's genesis however started many years ago as the state of california along with many other states embraced a standards based accountability system this accountability has now been coupled with the recent addition of the no child left behind legislation in a real sense we are entering both the best and worst of times i say this because of the effects of high stakes testing and the requirement that all students reach high levels of proficiency which admittedly are very lofty goals for this to be realized changes will be required in teaching and assessment as well as a more concentrated focus on student learning the instructional design introduced in this book advocates four components academic social collaborative contextual and cognitive developmental these components work in tandem with active teaching and learning strategies combined they form a student responsive instructional methodology which optimizes student success and academic achievement we wanted to create a book that demonstrated to those of us in the field of education the value of looking at academic standards with data about our students and reflecting on how this information should influence our choices concerning instructional practices and our perceptions about the students that we are entrusted with the focus of this endeavor is to see all students achieve and succeed and to keep passion and compassion at the heart of all that we do it is the premise of this book that the difference between effective and outstanding teachers are that outstanding teachers care know how to utilize data practice active teaching strategies and promote the active learning of students together these characteristics became the design and course of action that created a blueprint for success

the working model for helping the learner to learn presented in this book is relevant to any teaching context but the focus here is on teaching in secondary and college science classrooms specifically the goals of the text are to help secondary and college level science faculty examine and redefine their roles in the classroom define for science teachers a framework for thinking about active learning and the creation of an active learning environment and provide them with the assistance they need to begin building successful active learning environments in their classrooms active learning in secondary and college science classrooms a working model for helping the learner to learn is motivated by fundamental changes in education in response to perceptions that students

are not adequately acquiring the knowledge and skills necessary to meet current educational and economic goals the premise of this book is that active learning offers a highly effective approach to meeting the mandate for increased student knowledge skills and performance it is a valuable resource for all teacher trainers in science education and high school and college science teachers

this book offers a practical guide to successful strategies for active learning presenting a wide range of teaching tools including problem solving exercises cooperative student projects informal group work simulations case studies role playing and similar activities that ask students to apply what they are learning promoting active learning draws on the classroom experiences and tips of teachers from a variety of disciplines
