islands as well as entire continents are reputed to have disappeared in many parts of the world yet there is little information on this subject concerning its largest ocean the pacific over the years geologists have amassed data that point to the undeniable fact of islands having disappeared in the pacific a phenomenon that the oral traditions of many groups of pacific islanders also highlight there are even a few instances where fragments of pacific continents have disappeared becoming hidden from view rather than being submerged in this scientifically rigorous yet readily comprehensible account of the fascinating subject of vanished islands and hidden continents in the pacific the author ranges far and wide from explanations of the region s ancient history to the meanings of island myths using both original and up to date information he shows that there is real value in bringing together myths and the geological understanding of land movements a description of the pacific basin and the ups and downs of the land within its vast ocean is followed by chapters explaining how long before humans arrived in this part of the world islands and continents that no longer exist were once present a succinct account is given of human settlement of the region and the establishment of cultural contexts for the observation of occasional catastrophic earth surface changes and their encryption in folklore the author also addresses the persistent myths of a sunken continent in the pacific which became widespread after european arrival and were subsequently incorporated into new age and pseudoscience explanations of our planet and its inhabitants finally he presents original data and research on island disappearances witnessed by humans recorded in oral and written traditions and judged by geoscience to be authentic examples are drawn from throughout the pacific showing that not only have islands collapsed and even vanished within the past few hundred years but that they are also liable to do so in the future

my search for the origins of the whale culture has now taken me from the first findings on the east coast of greenland across the arctic ocean and down the bering sea to the aleutian islands here i have found evidence that they originated in the pacific which brings us to japan and the yonaguni monument here it becomes evident that the whale culture originated from hunter gatherers on the eurasian mammoth step who have begun to hunt seals and whales in the sea of japan and have then crossed over to japan from where their culture has adapted to the rich hunting waters of the pacific during the ice age the abundance of hunting game has led them to be very successful in the pacific and to have the resources to develop their unique culture where they lived on and hunted from the ice cover on the ocean on the journey from japan across the pacific we find evidence on hawaii that causes us to take a detour to kiritimati there we find evidence that very specific ocean currents during the ice age created a continent of ice in the pacific during the ice age with very rich waters both to the north and south of this ice continent on which the whale culture established a civilization that must have been the real lost continent of mu from this continent the whale culture of mu could cover the entire pacific in their airships based on whale skin and bone in our continued search we come to tahiti and new caledonia to find the source of the specific conditions in the ocean currents that led to the formation of the ice continent of mu and how these conditions started to collapse and led to the decline of the whale culture in the pacific we thus end up following the whale culture to new zealand where it tries to adapt to the missing sea ice and follows the ice south towards the antarctic before
