helpful in the design and development of army materiel so that it will meet the tactical
and the technical needs of the armed forces this handbook is one of a series on guns
and presents information on the fundamental operating principles and design of
muzzle devices because of higher priorities assigned in the past to other activities
progress in the design of bore evacuators noise suppressors and smoke suppressors
was not shared with that of muzzle brakes blast deflectors and flash suppressors
therefore less design guidance is presented for the first group of three than for the

second group however effort to improve all muzzle devices continues and this effort is being augmented by studies on human behavior when exposed to the phenomena created at the gun muzzle
