jacques tits was awarded the wolf prize in 1993 and the abel prize jointly with john thompson in
2008 the impact of his contributions in algebra group theory and geometry made over a span of
more than five decades is incalculable many fundamental developments in several fields of
mathematics have their origin in ideas of tits a number of tits papers mark the starting point of
completely new directions of research outstanding examples are papers on quadratic forms on

and on what subsequently became known as the *Collected Mathematical Papers of Jacques Hadamard*. These volumes contain an almost complete collection of his mathematical writings; they include in particular a number of published and unpublished manuscripts which have not been easily accessible until now. This collection of his contributions in one place makes the evolution of his mathematical thinking visible. The development of his theory of buildings and n -pairs and its bearing on the theory of algebraic groups, for example, reveal a fascinating story. Along with his mathematical writings, these volumes contain biographical data, survey articles on aspects of his work, and comments by the editors on the content of some of his papers. With the publication of these volumes, a major piece of 20th-century mathematics is being made available to a wider audience.
