a revolutionary collaborative approach to design and construction project delivery integrating project delivery is the first book length discussion of ipd the emergent project delivery method that draws on each stakeholder s unique knowledge to address problems before they occur written by authors with over a decade of research and practical experience this book provides a primer on ipd for architects designers and students

interested in this revolutionary approach to design and construction with a focus on ipd in everyday operation coverage includes a detailed explanation and analysis of ipd guidelines and case studies that show how real companies are applying these guidelines on real world projects end of chapter questions help readers quickly review what they ve learned and the online forum allows them to share their insights and ideas with others who either have or are in the process of implementing ipd themselves integrating project delivery brings together the owners architect engineers and contractors early in the development stage to ensure that problems are caught early and to address them in a collaborative way this book describes the parameters of this new more efficient approach with expert insight on real world implementation compare traditional procurement with ipd understand ipd guidelines and how they re implemented examine case studies that illustrate everyday applications communicate with other ipd adherents in the online forum the ipd approach revolutionizes not only the workflow but the relationships between the stakeholders the atmosphere turns collaborative and the team works together toward a shared goal instead of viewing one another as obstructions to progress integrated project delivery provides a deep exploration of this approach with practical guidance and expert insight

in this book a new method for hybrid intelligent systems is proposed the proposed method is based on a granular computing approach applied in two levels the techniques used and combined in the proposed method are modular neural networks mnns with a granular computing grc approach thus resulting in a new concept of mnns modular granular neural networks mgnnns in addition fuzzy logic fl and hierarchical genetic algorithms hgas are techniques used in this research work to improve results these techniques are chosen because in other works have demonstrated to be a good option and in the case of mnns and hgas these techniques allow to improve the results obtained than with their conventional versions respectively artificial neural networks and genetic algorithms

in february 2002 the industrial and systems engineering ise de partment at the university of florida hosted a national science founda tion workshop on collaboration and negotiation in supply chain man agement and e commerce this workshop focused on characterizing the challenges facing leading edge firms in supply chain management and electronic commerce and identifying research opportunities for de veloping new technological and decision support capabilities sought by industry the audience included practitioners in the areas of supply chain management and e commerce as well as academic researchers working in these areas the workshop provided a unique setting that has facilitated ongoing dialog between academic researchers and industry practitioners this book codifies many of the important themes and issues around which the workshop discussions centered the editors of this book all faculty members in the ise department at the university of florida also served as the workshop s coordinators in addition to workshop participants we also invited contributions from leading academics and practitioners who were not able to attend as a result the chapters herein represent a collection of research contributions monographs and case studies from a variety of disciplines and viewpoints on the aca demic side alone chapter authors include faculty members in supply chain and operations management marketing industrial engineering economics computer science civil and environmental engineering and building construction departments

this book presents recent advances on hybrid intelligent systems using soft computing techniques for intelligent control and robotics pattern recognition time series prediction and optimization of complex problems soft computing sc consists of several intelligent computing paradigms including fuzzy logic neural networks and bio inspired optimization algorithms which can be used to produce powerful hybrid intelligent systems the book is organized in five main parts which contain groups of papers around a similar subject the first part consists of papers with the main theme of hybrid intelligent systems for control and robotics which are basically state of the art papers that propose new models and

concepts which can be the basis for achieving intelligent control and mobile robotics the second part contains papers with the main theme of hybrid intelligent systems for pattern recognition and time series prediction which are basically papers using nature inspired techniques like evolutionary algorithms fuzzy logic and neural networks for achieving efficient pattern recognition or time series prediction the third part contains papers with the theme of bio inspired and genetic optimization methods which basically consider the proposal of new methods and applications of bio inspired optimization to solve complex optimization of real problems the fourth part contains papers that deal with the application of intelligent optimization techniques in real world problems in scheduling planning and manufacturing the fifth part contains papers with the theme of evolutionary methods and intelligent computing which are papers considering soft computing methods for applications related to diverse areas such as natural language processing recommending systems and optimization

the ghs addresses classification of chemicals by types of hazard and proposes harmonized hazard communication elements including labels and safety data sheets it aims at ensuring that information on physical hazards and toxicity from chemicals be available in order to enhance the protection of human health and the environment during the handling transport and use of these chemicals the ghs also provides a basis for harmonization of rules and regulations on chemicals at national regional and worldwide level an important factor also for trade facilitation this fifth revised edition of the ghs contains various new or revised provisions concerning inter alia new hazard categories for chemically unstable gases and non flammable aerosols further rationalization of precautionary statements and further clarification of some of the criteria to avoid differences in their interpretation publisher s description
