the literature review is a compulsory part of research and increasingly may form the whole of a student research project this highly accessible book guides students through the production of either a traditional or a systematic literature review clearly explaining the difference between the two types of review the advantages and disadvantages of both and the skills needed it gives practical advice on reading and organising relevant literature and critically assessing the reviewed field contents include using libraries and the internet note making presentation critical analysis referencing plagiarism and copyright this book will be relevant to students from any discipline it includes contributions from two lecturers who have many years experience of teaching research methods and the supervision of postgraduate research dissertations and a librarian each offering expert advice on either the creation and assessment of literature reviews or the process of searching for information the book also highlights the increasing importance for many disciplines of the systematic review methodology and discusses some of the specific challenges which it brings jill k jesson has worked with multi disciplinary research teams within the aston school of pharmacy aston business school and with m e l research an independent public services research consultancy she has now left aston university and is working as a consultant lydia matheson is an information specialist working for library information services at aston university fiona m lacey is an academic pharmacist a member of the pharmacy practice teaching group in the school of pharmacy and associate dean in the school of life and health sciences at aston

published in association with the wildlife society

many parts of the world are experiencing rapid demographic restructuring resulting in an ageing population with increasingly significant work and care pressures on cohorts less able or willing to provide support this book examines

some of the important trends that have underpinned reductions in fertility including delayed child bearing and increased childlessness it demonstrates how relationships between partners have resulted in new living arrangements with changing attitudes from marriage to co habitation as the social norm and it considers the health and well being for particular at risk groups such as the elderly and stepparents as well as aspects of mobility such as household migration and commuting to school the book brings together a series of studies that all involve quantitative analyses of secondary data from censuses surveys or administrative records the trends and patterns reported provide new and interesting insights into behaviour of the household and the roles of adults and children and point to questions of critical importance for practitioners and policy makers

integrated care aims to address inequality through removing fragmented health and social care it is being adopted worldwide including in the uk where the nhs is undergoing significant transformation as it introduces integrated care for all providers this new book aims to equip students and practitioners to take the lead in this new model of care delivery it will help them understand the key principles of integrated care and then apply these to the design implementation and practice of integrated care in their own work written by academics and operational healthcare leaders this book is ideal for final year students of nursing allied health and social care postgraduates and all nursing and allied health professionals who will be required to work within the uk s new integrated care systems comprehensive coverage of the design implementation and practice of integrated care covers theory and concepts of integrated care as well as applicability to practice for individuals organisations and systems presents a comprehensive and up to date evidence base for integrated care accessible to a range of practitioners wide range of case studies provide real life examples of how integrated care has been applied in different areas contributions from academics across disciplines including nursing occupational therapy social care and public health co written with business partners clinical leads or specialists within their field reflects the realities of practice includes an international focus with examples from countries which have a strong history in integrated

care such as the netherlands new zealand usa and finland

human evolutionary demography is an emerging field blending natural science with social science this edited volume provides a much needed interdisciplinary introduction to the field and highlights cutting edge research for interested readers and researchers in demography the evolutionary behavioural sciences biology and related disciplines by bridging the boundaries between social and biological sciences the volume stresses the importance of a unified understanding of both in order to grasp past and current demographic patterns demographic traits and traits related to demographic outcomes including fertility and mortality rates marriage parental care menopause and cooperative behavior are subject to evolutionary processes bringing an understanding of evolution into demography therefore incorporates valuable insights into this field just as knowledge of demography is key to understanding evolutionary processes by asking questions about old patterns from a new perspective the volume composed of contributions from established and early career academics demonstrates that a combination of social science research and evolutionary theory offers holistic understandings and approaches that benefit both fields human evolutionary demography introduces an emerging field in an accessible style it is suitable for graduate courses in demography as well as upper level undergraduates its range of research is sure to be of interest to academics working on demographic topics anthropologists sociologists demographers natural scientists working on evolutionary processes and disciplines which cross cut natural and social science such as evolutionary psychology human behavioral ecology cultural evolution and evolutionary medicine as an accessible introduction it should interest readers whether or not they are currently familiar with human evolutionary demography

publishes original critical reviews of the significant literature and current developments in psychology
