residenziale completamente sviluppato e con l'illustrazione di alcune realizzazioni domotiche di assoluto rilievo. Bruno de Nisco, ingegnere master in hba ed energie rinnovabili, è libero professionista progettista di impianti integrati e tecnologie speciali per gli edifici, consulente di progettazione integrata e di aspetti energetici ed esperto di normativa e conformità degli impianti e tecnologie e altresì docente in master e corsi di specializzazione postuniversitari e di aggiornamento su tematiche energetiche e normative.

In un'epoca di rapidi avanzamenti digitali, seguire le normative di settore è essenziale. Questo libro offre una guida chiara e pratica alle principali norme CEI 306 derivate dalle normative europee per la realizzazione di impianti di rete a regola d'arte, scritto da Stefano Toffano, sistemista di rete certificato e autore di manuali sulla sicurezza informatica. Il libro è pensato per installatori elettrici ed elettronici, progettisti di impianti di rete e utenti finali, con esempi concreti e spiegazioni semplici. I lettori impareranno a comprendere e applicare le normative per impianti di rete passivi in contesti industriali, terziari e residenziali. Questo manuale aiuterà a progettare, installare e mantenere impianti di rete conformi alle normative, fornendo una base solida per il lavoro quotidiano e per una comprensione completa delle parti attive. Si consiglia di consultare anche i precedenti volumi dell'autore.

Scientific thinking must be understood as an activity. The acts of interpretation, representation and explanation are the cognitive processes by which scientific thinking leads to understanding. The book explores the nature of these processes and describes how scientific thinking can only be grasped from a pragmatic perspective.
