in the early 1980s it was discovered that hiv the virus that causes aids could be passed through a mother s milk to her baby almost overnight in the industrialised countries and later in the african countries most ravaged by hiv breastfeeding became an endangered practice but in the rush to reduce transmission of hiv everything we already knew about breastfeeding s life saving effects was overlooked with devastating consequences for mothers and babies in hiv and breastfeeding the untold story former ibclc pamelamorrison an acknowledged authority on hiv and breastfeeding reveals how women in the world s most poverty stricken areas were persuaded to abandon breastfeeding as part of a short sighted and deadly policy that led to an humanitarian disaster the dilemma that breastfeeding an act of nurturing which confers food comfort and love could be at once life saving yet lethal has been called the ultimate paradox this critical account reveals how vital breastfeeding is even in the most difficult of circumstances and examines the lessons that can be learned from the mistakes of the past which is particularly relevant as we deal with the consequences for mothers and babies of another global pandemic covid 19 with detailed information for hiv positive mothers and their caregivers and success stories from mothers themselves this book is essential reading for anyone involved in protecting and supporting breastfeeding or with a need for evidence based information about breastfeeding and hiv

clinical naturopathic medicine is a foundation clinical text integrating the holistic traditional principles of naturopathic philosophy with the scientific rigour of evidence based medicine ebm to support contemporary practices and principles the text addresses all systems of the body and their related common conditions with clear accessible directions outlining how a practitioner can understand health from a naturopathic perspective and apply naturopathic medicines to treat patients individually these treatments include herbal medicine nutritional medicine and lifestyle recommendations all chapters are structured by system and then by condition so readers are easily able to navigate the content by chapter and heading structure the content is designed for naturopathic practitioners and students both undergraduate and

postgraduate levels and for medical and allied health professionals with an interest in integrative naturopathic medicine detailed coverage of naturopathic treatments provides readers with a solid understanding of the major therapeutic modalities used within naturopathic medicine each system is reviewed from both naturopathic and mainstream medical perspectives to correlate the variations and synergies of treatment only clinically efficacious and evidence based treatments have been included information is rigorously researched over 7500 references from both traditional texts and recent research papers the content skilfully bridges traditional practice and ebm to support confident practitioners within the current health care system

during the recent decades social political and academic endeavours have been made to improve environmental quality and reduce pollution in particular the ocean sea and coastal areas show varying degrees of impact from the multiple human activities carried out in the terrestrial as well as in the aquatic environment ecology is a science which studies the relationship between organisms and the surrounding environment and in the modern era the marine world is getting increasing attention for centuries it has been the final reservoir of human garbage later it became an oil farm with a concomitant increase of coastal population growth and unplanned growth of the fishing industry and the increasing use of sea routes for cargo transport and recreational uses cruises all this led to rising contamination with negative effects on biota and even human health it is then imperative to know the current situation of the world s oceans that is the main purpose of this book to document at a glance the latest research in the field of ocean pollution

according to world health organization who one billion people worldwide are affected by one of the thousands of neurological disorders including epilepsy alzheimer disease strokes and headaches neurological disorders also include brain injuries neuroinfections multiple sclerosis and parkinson disease a review on neurological disorders pathophysiology molecular mechanisms and therapeutics covers the major topics related to neurological disorders current challenges in diagnosis and intervention this book is organized into four distinct sections starting with an introduction providing a general overview of the epidemiology of neurological disorders pathogenesis and management the second section presents the aspects of brain diseases due to infection of bacteria parasite fungus and viruses the third section discusses neurodegenerative disorders due to comorbid factors like diabetes hypertension hyperlipidemia and post

traumatic brain injuries the last section covers prevention through application of bioactive compounds and neuroprotective agents epidemiology of neurological disorders and pathogenesis explores neuroinflammation ligand receptors binding and neurodegeneration discusses aging and associated disorders in the onset of neurological disorders neuropharmacology and the protective role of bioactive compounds in neuroprotection

country of poxes is the story of land theft in north america through three diseases syphilis smallpox and tuberculosis these infectious diseases reveal that medical care widely considered a magnanimous cornerstone of the canadian state developed in lockstep with colonial control over indigenous land and life pathogens are storytellers of their time the 500 year old debate over the origins of syphilis reflects colonial judgments of morality and sexuality that became formally entwined in medicine smallpox is notoriously linked with the project of land theft as colonizers destroyed indigenous land economies and life in the name of disease eradication and tuberculosis considered the indian disease aroused intense fear of contagion that launched separate systems of care for indigenous peoples in a de facto medical apartheid while white settlers retreated to sanatoria in the laurentians and georgian bay to be cured in this immersive and deeply reflective book physician and activist dr baijayanta mukhopadhyay provides riveting insights into the biological and social relationships of disease and empire country of poxes considers a future of health in canada that heeds redress and healing for nations brutalized by the canadian state
