the recent financial crisis has sparked debates surrounding the nature and role of accounting in informing capital markets and regulatory bodies about the financial performance and position of a firm these debates have drawn attention to the broader implications of accounting for the economy and society accounting and business economics brings together leading international scholars to examine the current state of accounting theory and its fundamental connection with the economics and finance of firms viewing the business entity from not only accounting but also national economic social political juridical anthropological and moral points of view

rainfed agriculture has a distinct place in indian agriculture occupying 68 per cent of the total cultivated area and supporting 40 per cent of human and 60 per cent of livestock population agriculture in rainfed areas continues to be a gamble because farmers in the rainfed region face many uncertainties in the light of growing population and demand to increase the food production especially in the developing countries with arid and csemi arid climate this book mainly focuses on the land use diversification involving multi disciplinary approaches for sustainability in the rainfed regions the present book consists of twenty three articles in all by experts from various central state government organisations agricultural universities and research organisations concerned with rainfed agriculture these articles covering various aspects of land use diversification for sustainable rainfed agriculture have been arranged into five sections a diversification need of the hour b natural resources dynamics c alternate land uses d case studies and e capacity building each of the articles is highly informative and it is hoped that this book will give an interesting insight into the varied rainfed agriculture related problems in india it highlights the possible measures sustainable management of land and water resources land use diversification alternate land uses based on climate soil and crop suitability etc that would help increase the cropland as well as crop and fodder production in rainfed areas the present book enriched with selected case studies will be particularly useful for students teachers researchers and scientists working in the area of rainfed agriculture and agricultural planning for sustainable development

forestry has long been in a rather favourable position in offering a valuable raw material source in high demand however with rapidly changing end user demands and cost competitiveness within the forest and wood chain as a whole the industry is needing to adapt explaining entrepreneurial action as part of a chain of comprehensive value added processes leads to a new perception of forest production and wood processing this book applies the main concepts of modern managerial science to the world of forestry and is the perfect book for students studying forestry and wood processing as well as entrepreneurs and managers within the sector topics are covered from an entrepreneurial perspective and include perspectives from accounting finance economics supply chain management marketing and strategy

this report draws on case studies to explore the relationship between environmentally related taxation and innovation to see whether taxation can spur innovation and if so what types

this book compares and contrasts the neo classic standard economics model with the behavioural economics model and shows how the latter attempts to explain the anomalies found in empirical research

this approach to managerial economics takes models from recent economic research and applies them to the internal structure of the firm after teaching basic applied economics the authors look inside the firm and apply this analysis to management decision making the general model used for this application is organizational architecture which consists of three aspects of corporate organization the assignment of decision rights within the company methods of rewarding individuals and the structure of systems to evaluate the performance of both individuals and business units these three elements must balance in an organization

with two distinct objectives this text s approach to managerial economics takes models from recent economics research and applies the research to the internal structure of a firm after teaching basic applied economics the authors look inside the firm and apply this analysis to management decision making authors brickley smith and zimmerman contend that organizational architecture consists of three aspects of corporate organization the assignment of decision rights within the company methods of rewarding individuals the structure of systems to evaluate the performance of both individuals and business units these three components can be likened to a stool with three legs if one of the legs is shorter the stool is out of balance these three elements must be in balance in the organization as well

there is widespread acceptance of the importance of infrastructure but less agreement about how it should be funded and procured while most public infrastructure is still provided in house or by traditional procurement methods with well researched strengths and weaknesses the development of service concession arrangements has seen a greater emphasis on lifecycle costing risk assessment and asset design as featured in a variety of public private partnership ppp delivery models this book examines the various procurement approaches and provides a framework for comparing their advantages and disadvantages drawing on international experience it considers some of the best and worst examples of ppps and infrastructure projects generally along with the lessons for improving infrastructure procurement processes
