groundwater constitutes an important component of many water resource systems supplying water for domestic use for industry and for agriculture management of a groundwater system an aquifer or a system of aquifers means making such decisions as to the total quantity of water to be withdrawn annually the location of wells for pumping and for artificial recharge and their rates and control conditions at aquifer boundaries not less important are decisions related to groundwater quality in fact the quantity and quality problems cannot be separated in many parts of the world with the increased withdrawal of ground water often beyond permissible limits the quality of groundwater has been continuously deteriorating causing much concern to both suppliers and users in recent years in addition to general groundwater quality aspects public attention has been focused on groundwater contamination by hazardous industrial wastes by leachate from landfills by oil spills and by agricultural activities such as the use of fertilizers pesticides and herbicides and by radioactive waste in repositories located in deep geological formations to mention some of the most acute contamination sources in all these cases management means making decisions to achieve goals without violating specified constraints in order to enable the planner or the decision maker to compare alternative modes of action and to ensure that the constraints are not violated a tool is needed that will provide information about the response of the system the aquifer to various alternatives

this book reminds the reader that many police shootings occur during diminished light and with few exceptions officers do not receive enough training in these conditions in addition recommendations are made for officers to use senses other than vision teamwork and technological innovations to increase an officer s chance of success when working in dim light or no light conditions the majority of crimes and officer shootings occur at night in diminished light or no light settings the federal

bureau of investigation reports that during a 9 year period 1985 1994 almost 63 percent of police officer deaths occurred between 6 00 p m and 6 00 a m during these hours it is difficult for officers to accurately identify an alleged suspect s face easily or identify any weapons he or she may be in possession of add stress and an increased heart rate to an already tense situation and it is easy to understand the need for additional training under these conditions the dark is fraught with peril and danger but increased training can alleviate stress and increase proficiency moreover officers can rely upon other senses and additional training can help facilitate decision making under these difficult circumstances technological advances and team techniques can also be incorporated into officer training directional microphones night vision and thermal imaging devices and infrared lights are a few of the technological advances that may aid officer shootings during dim light or no light environments
