from frankenstein and dracula to psycho and the chainsaw massacre horror fiction has provided our culture with some of

first published in 1964 behaviour in uncertainty begins with an analysis of the manner in which we weigh evidence or commit ourselves to a course of action from here it is but a step of choices when life and limb are at stake as in the behaviour of motorists and pedestrians on the road or when suicide is contemplated alone or with a loved one in all these situations as in acrobatics or on the playing field there are elements of risk and hazard and in all of them the individual may suffer from one of many diseases of decision making these variations on the theme of behaviour in uncertainty are traced by the author in experimental predicaments in adventures of the imagination in moments of crisis and in the confrontation with death all this jumps to life historically when viewed against the background of divinatory practices through the ages these universal practices demonstrate man s never ending efforts to conquer the uncertainties that desert him and in particular to wrest the secrets which the future has in store this is an interesting read for students of psychology

taking a sociological approach that stresses the dynamic interaction between teachers and students brian heraud in his book training for uncertainty originally published in 1981 explores the process by which students are prepared for a professional role at the heart of this process he argues there are numerous uncertainties expressed primarily in terms of the often polarised objectives of students and staff he traces the development of social work education and goes on to analyse the disparate attitudes among staff the way in which these influence the selection of students and their manifestation in the subsequent conflict in role playing and choice of role models experienced by those students the final part of the book is devoted to showing how students overcome such conflicts and prepare themselves for the transition from education to profession this volume will be of interest to students and researchers of sociology and social work

this insightful book critically assesses the subjectivist metatheoretical origins of the revival of modern austrian economics it examines the ideas of the main contributors to the austrian school including von mises von hayek and lachmann allen oakley analyses the contribution to subjectivist philosophy made by the key founders of the neo austrian revival he argues that while von mises and von hayek each confronted mainstream microeconomics with restricted subjectivist alternatives lachmann played the devil's advocate for a more comprehensive range of subjectivist principles the author finds that ultimately although all three provided analyses that reached well beyond the confines of neoclassical economics none fully applied the tenets of a complete subjectivism their contributions to the 1970s revival of interest in austrian themes and their

legacies for neo austrian schools of thought have thus left a great need for further methodological development if economics as a human science is to be reconstructed on subjectivist foundations the revival of modern austrian economics will be of central interest to students and scholars of austrian economics and to historians of economic thought and methodology more generally

james russell employs empirical historical techniques to explore how industrial conditions and the agendas of key directos

writers and producers led to the increased production of historical epics such as *Dances with Wolves*, *Titanic*, *Gladiator* and *The Passion of Christ*

In the 1970s the Keynesian orthodoxy in macroeconomics began to break down in direct contrast to Keynesian recommendations of discretionary policy models advocating *laissez faire* came to the forefront of economic theory. *Laissez faire* no longer stood as an exceptional policy endorsed for rare occurrences of market clearing rather it became the policy standard. This book provides the definitive account of this watershed and traces the evolution of *laissez faire* using the cases of its proponents: Frank Knight, Henry Simons, Friedrich von Hayek, Milton Friedman, James Buchanan and Robert Lucas. By elucidating the pre-analytical framework of their writings, Sherryl Kasper accounts for the ideological influence of these pioneers on theoretical work and illustrates that they played a primary role in founding the theoretical and philosophical use of rules as the basis of macroeconomic policy. A case study of the way in which interwar pluralism transcended to postwar neoclassicism is also featured. The volume concludes that economists ultimately favoured new classical economics due to the theoretical developments it incorporated although at the same time since Lucas uncritically adapted some of the ideas and tools of Friedman an avenue for ideological influence remained. Tracing the evolution of American macroeconomic theory from the 1930s to the 1980s this book will appeal to those with an interest in macroeconomics and in the history of scholars associated with the Chicago School of Economics.

Against the backdrop of the debate on the crisis of Western democracies and the supposed decline in young people's willingness to take on citizenship duties this book presents results of the EU project 'Political Participation of Young People in Europe'. It refers to the findings of the qualitative interviews and focus group discussions as well as the results of the representative surveys carried out among 15 to 25 year olds in Germany, Austria, Slovakia, Italy, France, Great Britain, Finland and Estonia. On the one hand the young people's concepts, images and perspectives on the political realm will be illuminated drawing attention to the complexity and ambivalence inherent in the ideals and accounts of political reality as well as the actual shortcomings of the system of representative democracy in modern society. On the other hand forms and extent of political participation will be discussed in a comparative perspective and the impact of socio-cultural and economic resources as well as opportunity structures for learning and participation analysed in this context. Socialisation and

transmission of values cultures and behaviour by parents peers school and voluntary associations are of particular interest beyond the presentation of the empirical findings the book will discuss methodological difficulties of comparative participation research and problems of validity book jacket
