longer lifespans and the needs of the oldest old are challenging the senior living industry to find bold and compassionate solutions to combine programs and services with housing victor regnier s latest research provides a thoughtful and insightful roadmap that arrays new ways of thinking from small scale settings to community based options international case studies offer possible solutions with the best thinking from around the globe all with vic s unique perspective of extracting themes and concepts that are broadly applicable and essential to addressing the needs of those that live on life s fragile edge david hoglund faia supporting the independence of the oldest old is a tough problem victor regnier addresses in his latest book on aging and housing like previous work victor relies on the best practices of northern europeans to outline a three prong approach first providing extremely comprehensive home care services in an apartment for life setting second reforming the conventional nursing home by exploring small group style accommodations third combining new technology with community based services to age in place case studies document the experiences of others in making these programs work here and abroad the magnitude of the 90 and 100 population increases in the next 50 years make it clear how important it is to address this concern today edward steinfeld darch the movement of health care from the institution to the home is a theme that regnier identifies as one of the most important lessons in rethinking the issue of how to support the ever growing and increasingly aged older population here and abroad he examines simple but profound approaches we can take in making long term care a more humane proposition familiar themes like humanizing technology and optimizing the impact of the natural environment are brought together with clear policy thinking about what we need to do the timing is good because the impact of this growing segment of society will have major repercussions on health care for the next 50 70 years stephan verderber ph d a comprehensive guide to designing housing for the world s aging population the dilemma of helping older people maintain their independence through better housing with services is growing this book presents innovative solutions for those who create and provide housing for the world s increasingly longer living population by focusing on three specific housing and service arrangements it offers alternatives that provide greater freedom of choice than the current living arrangements that exist today

it presents selected examples of housing and service solutions from the us sweden denmark and the netherlands to stimulate thinking about the possibilities of community based service models housing design for an increasingly older population looks at a trio of options for housing the oldest old the dutch apartment condo for life model afl decentralized small green houses and the provision of enhanced personal and health care for people who want to stay in their own home it offers unique and eye opening chapters covering what older people want what age changes affect independence demographics and living arrangements how long term care is defined concepts and objectives for housing the frail care giving and management practices that avoid an institutional lifestyle innovative case studies programs that encourage staying at home with service assistance therapeutic use of outdoor spaces how technology will help people stay independent and more based on the author s numerous conversations with other experts as well as his examinations of high quality settings from northern europe and the us building case study examples showcase innovative and compassionate solutions in depth coverage of three major systems that work examines successful programs such as pace friendly cities norc and the village to village network to demonstrate the progress made in helping older frail people stay in their own homes for as long as possible housing design for an increasingly older population redefining assisted living for the mentally and physically frail is an important book for those who create design and manage assisted living and skilled nursing facilities as well as for those who set policies regarding health and personal care for our world s aging society

a bible student reference a new testament prophecy of a falling away from truth into apostasy and lawlessness in the final generation before jesus christ returns in glory is being fulfilled now and is shortly to end yet christianity has overwhelmingly moved so far from its first century roots that it could not even recognise this or that christ s return is therefore now almost upon us how and why this is the case is here explained thoroughly and logically with many examples directly from the word of god in god s saving plan for the world everyone must in time make a free will choice to become part of the israel of god in order to access eternal life in the kingdom of god the route to take is the strait and narrow way mat 7 13 14 that very few have so far found and it involves the biblical new and old covenants which both apply to this israel embark on this voyage only if you are willing to be challenged about some basic christian preconceptions be a serious open minded bible student and trust what the bible teaches but remember that time is short what the bible has taught me i see as both vital and urgent for our eternal salvation yet i know of no church or individual theologian who teaches what this book deals with in any substantive way be prepared for major challenges to your understanding just as god has challenged me in the epistles paul refers to two israels whom he calls israel after the flesh i cor 10 18 and the israel of god gal 6 16 i focus mainly on the latter but i also explain an

unexpected but critically important connection between them dependent on the teaching nearly all christian denominations either teach nothing at all on it or almost the opposite of what scripture repeatedly showed me looking back i find this absolutely staggering very few christians understand that the new covenant also only applies to israel as i will clearly show i no longer believe that the nt new testament can be fully understood without this extra israel dimension had i felt i could deliver this in a more light hearted way i would have done so but its implications are too awesome and fundamental to our eternal life prospects for that

maintenance safety risk management and life cycle performance of bridges contains lectures and papers presented at the ninth international conference on bridge maintenance safety and management iabmas 2018 held in melbourne australia 9 13 july 2018 this volume consists of a book of extended abstracts and a usb card containing the full papers of 393 contributions presented at iabmas 2018 including the t y lin lecture 10 keynote lectures and 382 technical papers from 40 countries the contributions presented at iabmas 2018 deal with the state of the art as well as emerging concepts and innovative applications related to the main aspects of bridge maintenance safety risk management and life cycle performance major topics include new design methods bridge codes heavy vehicle and load models bridge management systems prediction of future traffic models service life prediction residual service life sustainability and life cycle assessments maintenance strategies bridge diagnostics health monitoring non destructive testing field testing safety and serviceability assessment and evaluation damage identification deterioration modelling repair and retrofitting strategies bridge reliability fatigue and corrosion extreme loads advanced experimental simulations and advanced computer simulations among others this volume provides both an up to date overview of the field of bridge engineering and significant contributions to the process of more rational decision making on bridge maintenance safety risk management and life cycle performance of bridges for the purpose of enhancing the welfare of society the editors hope that these proceedings will serve as a valuable reference to all concerned with bridge structure and infrastructure systems including students researchers and engineers from all areas of bridge engineering

the marine environment is almost ideal for the preservation of artefacts and until relatively recently it also provided complete protection from destruction by man however the aqualung has made most shallow underwater sites accessible leading to widespread plundering current deep sea bed technology now threatens deep water sites there is a need for immediate international action to preserve the man made environment alongside the natural one the enunciation of legal rules to protect the underwater cultural heritage is a complex issue involving a matrix of interests and laws both international and national
